The Science of Stuck: Breaking Through Inertia to Find Your Path Forward 2022-03-15 this book outlines with theoretical and literary historical rigor a highly innovative approach to the writing of russian literary history and to the reading of canonical russian texts anticipatory plagiarism is a concept developed by the french oulipo group but it has never to my knowledge been explored with reference to russian studies the editors and contributors to the proposed volume a blend of senior and beginning scholars russians and non russians offer a set of essays on gogol dostoevsky and tolstoy which provocatively test the utility of ap as a critical tool relating these canonical authors to more recent instances some of them decidedly non canonical the senior scholars who are the editors and most of the contributors are truly distinguished the volume is likely to receive serious attention and to be widely read i recommend it with unqualified enthusiasm william mills todd iii harry tuchman levin professor of literature harvard university as the founder of the notion of plagiarism by anticipation which was stolen from me in the sixties by fellow colleagues i am delighted to learn that my modest contribution to literary theory will be used to better understand the interplay of interferences in russian literature indeed one would have to be naive to think that the great russian authors would have invented everything in fact they were able to draw their ideas from their predecessors but also from their successors testifying to the open mindedness that characterizes the slavic soul this book restores the truth pierre bayard professor of literature university of paris 8 this edited volume employs the paradoxical notion of anticipatory plagiarism developed in the 1960s by the oulipo group of french writers and thinkers as a mode for reading russian literature reversing established critical approaches to the canon and literary influence its contributors ask us to consider how reading against linear chronologies can elicit fascinating new patterns and perspectives reading backwards an advance retrospective on russian literature re assesses three major nineteenth century

authors gogol dostoevsky and tolstoy either in terms of previous writers and artists who plagiarized them such as raphael homer or hall caine or of their own depredations against later writers from j m coetzee to liudmila petrushevskaja far from suggesting that past authors literally stole from their descendants these engaging essays contributed by both early career and senior scholars of russian and comparative literature encourage us to identify the contingent and familiar within classic texts by moving beyond rigid notions of cultural heritage and literary canons they demonstrate that inspiration is cyclical influence can flow in multiple directions and no idea is ever truly original this book will be of great value to literary scholars and students working in russian studies the introductory discussion of the origins and context of plagiarism by anticipation alongside varied applications of the concept will also be of interest to those working in the wider fields of comparative literature reception studies and translation studies
