**State Criminal Justice Telecommunications (STACOM): Lee, J. Network design software user's guide** 1978 db2 9 for z os is an exciting new version with many improvements in performance and little regression db2 v9 improves availability and security as well as adds greatly to sql and xml functions optimization improvements include more sql functions to optimize improved statistics for the optimizer better optimization techniques and a new approach to providing information for tuning v8 sql procedures were not eligible to run on the ibm system z9 integrated information processor ziip but changing to use the native sql procedures on db2 v9 makes the work eligible for ziip processing the performance of varying length data can improve substantially if there are large numbers of varying length columns several improvements in disk access can reduce the time for sequential disk access and improve data rates the key db2 9 for z os performance improvements include reduced cpu time in many utilities deep synergy with ibm system z hardware and z os software improved performance and scalability for inserts and lobs improved sql optimization ziip processing for remote native sql procedures index compression reduced cpu time for data with varying lengths and better sequential access virtual storage use below the 2 gb bar is also improved this ibm redbooks publication provides an overview of the performance impact of db2 9 for z os especially performance scalability for transactions cpu and elapsed time for queries and utilities we discuss the overall performance and possible impacts when moving from version to version we include performance measurements that were made in the laboratory and provide some estimates keep in mind that your results are likely to vary as the conditions and work will differ in this book we assume that you are familiar with db2 v9 see db2 9 for z os technical overview sg24 7330 for an introduction to the new functions

Solar Energy Update 1981 ibm continues to enhance the functionality performance availability and ease of use of ibm db2 utilities this ibm redbooks publication is the result of a project dedicated to the current db2 version 9 utilities suite product it provides information about introducing the functions that help set up and invoke the utilities in operational scenarios shows how to optimize concurrent execution of utilities and collect information for triggering utilities execution and provides considerations about partitioning it also describes the new functions provided by several utilities for share level change execution which maximize availability and the exploitation of dfsms constructs by the backup and restore system utilities this book concentrates on the enhancements provided by db2 udb for z os version 8 and db2 for z os version 9 it implicitly assumes a basic level of familiarity with the utilities provided by db2 for z os and os 390 version 7
