Does Gross or Net Debt Matter More for Emerging Market Spreads?

2017-01-18

does gross or net debt matter for long term sovereign spreads in emerging markets the topic is important for understanding the borrowing cost implications of public assetliability management decisions e g using assets to lower debt we investigate this question using data on emerging market economies emes over the period 1998 2014 we find that both gross debt and assets have a significant impact on long term sovereign bond spreads in emerging markets with effects roughly offsetting each other coefficients of opposite sign and similar magnitude hence net debt seems more appropriate than gross debt when evaluating the impact of indebtedness on spreads the empirical results suggest that an increase in net debt by 10 percentage points of gdp

implies an increase in the spread by 100 120 basis points and the effect is larger during periods of domestic distress the key results from this empirical study are quite robust to alternative specifications and subgroups of emes

Do Institutions Matter More for Services?

2006

recent empirical research has focused on the role of institutions in overall economic performance this paper examines the impact of institutions on the relative performance of the service sector through cross country level and growth regressions it establishes the following stylized fact countries with better institutions have relatively larger and more dynamic service sectors it suggests that regulatory and contract enforcing institutions play a key role in the development of service sectors because these sectors enter into a more complex web of transactions with the rest of the economy and are more prone to market failure due to asymmetric information

More than Matter?

2011-10-22

the question of what it is to be a human person is the biggest intellectual question of our day keith ward has taught philosophy and theology in british universities for the past 40 years and he is now weighing in on a major intellectual battle whether human persons are purely materialistic nothing but matter or whether there is another deeply valuable part of us which transcends our bodies in nature and moral worth the soul for centuries philosophers have debated the question but the battle has taken the limelight through the works of the new atheists in this book professor ward guides the reader through a panoply of thinkers and traditions arguing that there is more to humanity than bodies in fact he argues there is more to the entire universe than the naked eye perceives and contrary to the new atheist assertions there are good philosophical arguments to back this up

the physics of condensed matter in contrast to quantum physics or cosmology is not traditionally associated with deep philosophical questions however as science largely thanks to more powerful computers becomes capable of analysing and modelling ever more complex many body systems basic questions of philosophical relevance arise questions about the emergence of structure the nature of cooperative behaviour the implications of the second law the quantum classical transition and many other issues this book is a collection of essays by leading physicists and philosophers each investigates one or more of these issues making use of examples from modern condensed matter research physicists and philosophers alike will find surprising and stimulating ideas in these pages
