## **New Materialist Explorations into Language Education**

2022-10-10

this open access book analyzes language education through a socio material framework the authors revisit their position as researchers by decentering themselves and humans in general from the main focus of research activities and giving way to the materialities that are agentive but often overlooked parts of our research contexts and processes through this critical posthumanist realism they are able to engage in research that sees society as an ethical interrelationship between humans and the material world and explore the socio materialities of language education from the perspectives of material agency spatial and embodied materiality and human and non human assemblages each chapter explores language educational contexts through a unique lens of socio materiality based on how the authors conceptualize socio materiality the book is organized in three sections that seek answers to the following overarching questions in what ways do material agencies emerge in language educational contexts how are educational choices and experiences intertwined with materialities of spaces and bodies what assemblages of human and non human may occur in language education contexts each chapter questions in its own way the notion of the human

subject as rational enlightened being and sole possessor of agency and offers examples of allowing for other than human agency to enter the picture together the contributors exemplify how researchers who have been committed to social constructionist thinking for most of their careers learn to make space for new theories thus inspiring and encouraging readers to remain open for new intellectual and embodied endeavors

indonesia is one of the few countries that came through the global economic crisis in 2008 09 with positive economic growth despite some recorded positive domestic economic performances indonesia faces new challenges as its economy keeps growing and the global economy remains uncertain a new economic development paradigm is needed to overcome old problems poverty and unemployment inadequate infrastructure corruption a complex regulatory environment and unequal resource distribution among regions with global market

opportunities this book provides a new perspective on how Indonesian's economic policies should be developed by considering its past and future challenges. Firmanzah, professor of economics and dean of faculty of economics, University of Indonesia; Aris Ananta Muljana, Soekarni, and Sjamsul Arifin gather excellent researchers and practitioners to discuss important economic policy issues for Indonesia today. They discuss monetary and fiscal policies and real economic sector issues based not only on theoretical analysis but also on their day-to-day experience in economic management. By reviewing Indonesia's economic policy reform and subsequent Asian financial crisis and subprime loan crisis, the authors present a new economic development paradigm and explore economic strategy and policies for the new era. The book offers many timely lessons from history as well as the real policy experiences of the authors and guides readers in exploring economic policies under the globalized world economy. This book is very useful for both practitioners and researchers.

Masaaki Komatsu, professor of economics, Hiroshima University

in 1973 henry kissinger shared the nobel peace prize for the secret negotiations that led to

the agreement on ending the war and restoring peace in vietnam nixon famously declared the 1973 agreement to be peace with honor america was disengaging yet south vietnam still stood to fight its own war kissinger promptly moved to seal up his personal records of the negotiations arguing that they are private not government records and that he will only allow them to be unsealed after his death no peace no honor deploys extraordinary documentary bombshells including a complete north vietnamese account of the secret talks to blow the lid off the true story of the peace process neither nixon and kissinger s critics nor their defenders have guessed at the full truth the entire peace negotiation was a sham nixon did not plan to exit vietnam but he knew that in order to continue bombing without a congressional cutoff he would need a fig leaf kissinger negotiated a deal that he and nixon expected the north to violate ironically their long maintained spin on what happened next is partially true only watergate stopped america from sending the bombers back in this revelatory book has many other surprises berman produces new evidence that finally proves a long suspected connection between candidate nixon in 1968 and the south vietnamese government he tells the full story of operation duck hook a large scale offensive planned by nixon as early as 1969 that would have widened the war even to the point of bombing civilian food supplies he reveals transcripts of candidate george mcgovern s attempts to negotiate his own october surprise for 1972 and a seriocomic plan by the cia to overthrow south vietnam s president thieu even as late as 1975 throughout with page turning dialogue provided by official transcriptions and notes berman reveals the step by step betrayal of

south vietnam that started with a short circuited negotiations loop and ended with double talk false promises and outright abandonment berman draws on hundreds of declassified documents including the notes of kissinger s aides phone taps of the nixon campaign in 1968 and mcgovern s own transcripts of his negotiations with north vietnam he has been able to double and triple check north vietnamese accounts against american notes of meetings as well as previously released bits of the record he has interviewed many key players including high level south vietnamese officials this definitive account forever and completely rewrites the final chapter of the vietnam war henry kissinger s nobel prize was won at the cost of america s honor
