a result of an extended coordinated collaboration of one hundred and fifty four distinguished scientists from thirty one countries around the globe a review of common as well as unusual yet clinically significant medical cardiac complications of prevalent rheumatic autoimmune and inflammatory diseases focuses on aspects of pathophysiological processes clinical presentations screening tests prognostic implications and novel therapeutic approaches presents an up to date level of evidence and strengths of recommendations for suggested therapies and reviews all randomized clinical trials meta analyses and other supporting published clinical findings

Sleep-Wake Disorders 2017-02-10 handbook of sleep disorders in medical conditions reviews the current knowledge on the nature and manifestations of sleep disorders associated with a variety of common medical conditions including epilepsy traumatic brain injury and dementia it also provides clinical guidelines on how to assess and treat them with pharmacological and non pharmacological interventions although the general principles of sleep medicine may be applied to some extent to patients with comorbid medical conditions this book makes the case that an adaptive approach is warranted when considering the particularities of each condition in addition clinicians must also be cautious when prescribing sleep medications as some pharmacological agents are known to exacerbate symptoms associated with the medical condition such as cognitive deficits i e difficulties with memory and attention in cancer patients experiencing chemo brain or in persons with neurologic conditions e g mild cognitive impairment dementia stroke brain injury a differential approach to evaluating and treating sleep is thus warranted presents a general overview on assessing and treating sleep disorders that are applicable to a diverse set of patients provides a comprehensive up to date review of the literature on the prevalence and manifestations of sleep problems related to specific medical conditions includes practical information regarding special considerations for the assessment and treatment of sleep issues in specific medical conditions

*The Heart in Rheumatic, Autoimmune and Inflammatory Diseases* 2019-03-14 the spectrum of sleep disordered breathing ranges from primary snoring at one end to obstructive sleep apnea and central sleep apnea at the other end the first chapter in this book provides current state of knowledge about the mechanisms of obstructive sleep apnea and central sleep apnea and reviews emerging therapies for these disorders furthermore sleep apnea usually has multifactorial causes and affects multiple organic systems resulting in increased cardiovascular morbidity disturbing sleep quality metabolic balance glucose and cholesterol levels arterial hypertension and thus increasing cardiopulmonary and vascular morbidity the second chapter summarises the main findings in literature and provides a brief and concise differential diagnosis the authors of the third chapter expose and discuss current evidence of neurosurgical conditions and their role in the genesis and progression of sleep apnea they emphasise the adequate

treatment and future perspectives the following chapter examine the effect of obstructive sleep apnea syndrome osas on the eye different ophthalmologic disorders are associated with osas including floppy eyelid syndrome retinal vein occlusion and central serious retinopathy the last chapter in this book is focused on qt dispersion in patients with obstructive sleep apnea with increased qt dispersion potentially reflecting disturbed myocardial repolarisation and predisposition to cardiac arrhythmias

Handbook of Sleep Disorders in Medical Conditions 2015 this book addresses various aspects of testicular autoimmunity it has long been suspected that testicular autoimmunity could be one of the causes of idiopathic male infertility however it is very difficult to estimate the incidence of testicular autoimmunity in men as most male patients first realize they are infertile when they start trying to conceive a child and there is a possibility that their testes may already exhibit the end stage of testicular autoimmunity in which lymphocytic inflammation and immunoglobulin deposition in their testes subsided long ago and only the spermatogenic disorder remains therefore autopsy or biopsy for testicular tissues in men before the end stage of testicular autoimmunity and investigations using testicular autoimmunity model animals are needed to determine the epidemiology of testicular autoimmunity accordingly the book discusses the immunological fragility of testis with regard to male infertility reviewing autopsy data in men and presenting experimental data using murine models of autoimmune orchitis that has been induced by immunizing with viable syngeneic testicular germ cells alone testicular autoimmunity in animals is also discussed in summary the book provides a wealth of valuable information not only for researchers who are interested in immunologic male infertility but also for clinical professionals who treat these patients at hospitals
