many of his writings mccarthy s animals exist within the framework of a fictional natural world technology  
biological determinism wild animals prey upon feral and domestic animals horses exist as warriors and  
the hunt is a ballet between man and hunting hound proximity to humans results in mistreatment and  
death while distance results in survival and fitness mccarthy also utilizes animals as harbingers of  
specific events for example hogs are so frequently a precursor of human death that mccarthy s  
narrators and characters wonder whether hogs are joined to the devil for evil purposes the first chapter  
here examines animal presentations in the stonemason the gardener s son and two short stories  
bounty and the dark waters the following nine chapters focus on one text one type of animal feline  
swine bovine bird and bat canine equine lupine and hound and one particular thesis each chapter also  
briefly examines the specific animal as it exists in other mccarthy works
