Nine Stories by J. D. Salinger | Summary & Study Guide 2012-07-17 there is no disputing that the coming of sound heralded a new era for adaptations we take it for granted today that a film is enhanced by sound but it was not a view unanimously held in the early period of sound cinema while there was a substantial degree of skepticism in the late 1920s and early 30s about the advantages of sound what we would call technophobia today the inclusion of speech in screen versions of literary and theatrical works undeniably revised what it was to be an adaptation words focusing on promotional materials adaptations in the sound era tracks early attempts to promote sound through the elevation of words in adaptations in the early sound period the popular appeal of these films clearly stands in opposition to academic regard for them and the book reflects on the presence and marketing of words in a variety of adaptations from the introduction of sound in the late 1920s to the mid 1930s this book contextualizes a range of adaptations in relation to debates about picturizations of books in the early sound era including reactions to the talking adaptation by writers such as irwin panofsky aldous huxley and graham greene film adaptations of shakespeare dickens gothic fiction and biopics are also discussed in relation to their use and promotion of sound or more precisely words
