good choi fitzpatrick analyzes the way small scale
drones as well as satellites kites and balloons are
used for a great many things including documenting
human rights abuses estimating demonstration crowd size
supporting anti poaching advocacy and advancing climate
change research in fact he finds small drones are used
disproportionately for good nonviolent prosocial uses
predominate choi fitzpatrick s broader point is that
the use of technology by social movements goes beyond
social media and began before social media from the
barricades in les misérables to hacking attacks on
corporate servers to the spread of the metoo hashtag on
twitter technology is used to raise awareness but is
also crucial in raising the cost of the status quo new
technology in the air changes politics on the ground
and raises provocative questions along the way what is
the nature and future of the camera when it is taken
out of human hands how will our ideas about privacy
evolve when the altitude of a penthouse suite no longer
guarantees it working at the leading edge of an
emerging technology choi fitzpatrick takes a broad view
suggesting social change efforts rely on technology in
new and unexpected ways
