Innovazione tecnologica e sviluppo industriale nel secondo dopoguerra 2007

il libro ripercorre cinquanta anni della storia produttiva di roma ponendo al centro dell'analisi gli operatori economici l'autrice scompone la descrizione della formazione del tessuto produttivo della capitale nel secondo dopoguerra in due distinti periodi il primo dagli anni cinquanta agli anni settanta il secondo dagli ottanta al duemila la linea di demarcazione viene fissata negli anni settanta quando si esaurisce la spinta industriale impressa dal regime fascista e gli investimenti a roma cominciano a spostarsi verso il terziario più avanzato mano a mano che la descrizione coinvolge i settori portanti dell'economia della capitale l'autrice evidenzia caratteristiche e tratti salienti dei percorsi professionali di quegli imprenditori che hanno creduto nelle possibilità di crescita di una città economicamente difficile particolarmente esposta alle fasi di congiuntura negativa molti di loro sono riusciti a mantenere nel tempo vive ed operative le aziende rinnovandole sfidando la concorrenza internazionale trasformandole in spa diversificando allargando il raggio d'azione oltre la frontiera nazionale l'analisi degli operatori economici tiene conto di un modello imprenditoriale che a partire dagli anni cinquanta muta a favore di una classe di investitori che non è più solo esogena proveniente dalle zone economicamente più avanzate della penisola e appartenente alla cultura del learning by doing ma istruita ed aperta al confronto internazionale in

questo passaggio la transizione generazionale assume un ruolo centrale a partire dagli anni ottanta l'affermazione nella capitale di un ramo del terziario altamente innovativo come quello dei business service s'impone ai giovani una più aggiornata mentalità imprenditoriale ed una formazione professionale ad hoc per guidare le piccole e medie aziende familiari la capacità di innovare grazie a competenze altamente qualificate è ciò che oggi serve all'impresa per sostenere le sfide del mercato globale

pia toscano insegna storia economica e storia dell'impresa nella facoltà di economia dell'università degli studi di cassino il filone principale dei suoi studi ha riguardato la storia dell'industria a roma coprendo il lungo arco di tempo che va dalla fase preunitaria alla seconda guerra mondiale oltre a numerosi articoli e saggi ha dedicato all'argomento due monografie roma produttiva tra settecento e ottocento il caso del san michele a ripa grande e le origini del capitalismo industriale e nel lazio imprese e imprenditori a roma dall'unità alla seconda guerra mondiale recentemente ha rivolto i suoi studi ad un tema di attualità quale quello del confronto generazionale all'interno delle piccole e medie imprese familiari e alla ricostruzione su base archivistica della vicenda degli ebrei libici relativamente all'impatto economico che questa collettività ha avuto alla fine degli anni sessanta del novecento sulla comunità ebraica della capitale

Innovazione tecnologica e sviluppo *industriale nel secondo dopoguerra 2007*

this book provides a wide ranging analysis of change in size and nature of italian firms and thus a unique and fascinating perspective on the evolution of one of the major industrial economies of the 20th century an example of business history as it ought to be done giovanni federico european university institute italy this book is necessary reading for a real understanding of the evolution of italian capitalism during the last century it moves away from a simplified view of the italian industrial structure as just composed by small enterprises and successfully sheds light on the variety of different forms of enterprises the compose italian system the lively picture that emerges from this book is the one of richer types of enterprises which have evolved over time and have contributed in different ways to italian economic growth franco malerba bocconi university italy taking an historical perspective this unique book highlights the evolution of the many diverse forms of business enterprise and discusses the contribution of these different types of firm to the economic growth of italy one important issue that has recently captured the attention and the research efforts of both economists and economic historians has been the debate on varieties of capitalism in the modern world in this context the expert contributors analyze the various stages of italian development that have been characterized by diverse

dominating forms of enterprise which in turn have adapted to the nature of technological and market opportunities at the institutional national and international level this book proposes a new interpretation of the italian case that utilizes both the structural and macroeconomic perspective of comparative history as well as the microeconomic perspectives focusing on the strategies of different economic agents based on solid quantitative evidence this original work will prove to be a valuable resource for academics and students of strategy and organization economic historians and applied economists

Ricostruzione e industria 1980

this oxford handbook provides a fresh overall view and interpretation of the modern economic growth of one of the largest european countries whose economic history is less known internationally than that of other comparably large and successful economies it will provide for the first time a comprehensive quantitative new economic history of italy the handbook offers an interpretation of the main successes and failures of the italian economy at a macro level the research conducted by a large international team of scholars contains entirely new quantitative results and interpretations spanning the entire 150 year period since the unification of italy on a large number of issues by providing a comprehensive view of the successes and failures of italian firms workers and policy makers in responding to the challenges of the international

business cycle the book crucially shapes relevant questions on the reasons for the current unsatisfactory response of the italian economy to the ongoing second globalization most chapters of the handbook are co authored by both an italian and a foreign scholar

Imprenditori a Roma nel secondo

dopoguerra 2016-01-03T00:00:00+01:00

this research carried out in original documents by the world bank which were intended exclusively for internal use and were made available to scholars only a few years ago tackles the theme of the extraordinary intervention in southern italy from an international perspective the book provides an updated view of the issues concerning the regions of southern italy as well as the solutions proposed for the southern question during the years of the post war reconstruction of italy creating the only period of convergence considering the whole of the history of united italy between southern and northern italy and between the entire country and the most advanced western economies during the golden age the volume enhances our understanding of such a decisive development phase especially within the framework of both italian and international economic history following the peacetime rebuilding of italy and before the crisis of the 1970s while providing very useful elements in order to analyse the current events of both the mezzogiorno and all of

italy

Le privative industriali nel diritto italiano *1891*

drawing on kaleckian and kaldorian approaches political economy of contemporary italy the economic crisis and state intervention explores the reasons behind the stagnation of the italian economy from the 1970s and suggests policy solutions to ease the crisis the central thesis of the book is that from the early 1990s italy experienced a constant reduction of both private and public investment which combined with increasing labour precariousness and wage moderation contributed to the decline of both labour productivity and economic growth it is argued that lack of industrial policies amplified the problem of the poor macroeconomic performance since italian firms small sized and non innovating were incapable of staying competitive on the global scene net exports did not compensate for the decline of public spending private investment and consumption it is also shown that in these respects italy presents an interesting case study with wider ramifications for it was involved in the global process of intensifying the neoliberal agenda but at a faster rate than other oecd countries the book concludes with a call for an alternative economic policy in order to promote innovation reduce unemployment and stimulate economic growth this book marks a significant contribution to the literature on the

recent history of the european economy italian studies and the history of economic thought

Atti del comitato per l'inchiesta industriale nel regno d'Italia 1871

after a quarter century of almost general condemnation and rebuttal of the entire nationalization experience it appears that there are second thoughts about governmental direct intervention in the economy reappraising state owned enterprise deals with a topic often undervalued in the past decade but which now with the crisis of 2008 2009 calls for greater attention the direct intervention of the state as entrepreneur the collection of essays in this volume prepared by some of the leading authorities in the field offers a contribution to this debate by providing a balanced assessment of two of the most relevant experiences of mixed economies the united kingdom and italy in this respect a comparison between these two countries is very much appropriate since in both nations the state played an important role as entrepreneur starting in the early 20th century in great britain and italy the heyday of the state as entrepreneur was in the years right after wwii when it was used as a tool for promoting a modern society in which citizens acquired a stronger sense of belonging to their nations the uk and italy saw the state take on a too pervasive role in the 70s the two nations responded in different ways in the 1980s

great britain embarked on a harsh process of privatizations while italians struggled on until finally submitting to privatizations in their nation in the following decade the deep crisis of the final years of the 21st century forced both nations to reconsider state interventions as an appropriate tool in order to protect the wellbeing of the national economy

L'ingegnere rivista tecnica del Sindacato nazionale fascista ingegneri 1884

this volume presents selected contributions from the 2018 conference of the international schumpeter society iss the selected chapters in this volume reflect the state of the art of schumpeterian economics dedicated to the three conference topics innovation catch up and sustainability innovation is driving catch up processes and is the condition for a transformation towards higher degrees of sustainability therefore schumpeterian economics has to play a key role in these most challenging fields of human societies development in the 21st century the three topics are well suited to capture the great variety of issues which have the potential to shape the scientific discussion in economics and related disciplines in the years to come the presented contributions show the broadness and high standard of schumpeterian analysis the ideas of dynamics heterogeneity novelty and innovation as well as transformation are the most attractive fields in economics today

and offer the most prolific interdisciplinary connections now and for the years to come when humankind our global society has to master the transition towards sustainable economic systems by solving the grand challenges and wicked problems with which we are confronted today therefore the book is a must read for scholars researchers and students interested in a better understanding of innovation catch up and sustainability and schumpeterian economics in general the chapter industrial life cycle relevance of national markets in the development of new industries for energy technologies the case of wind energy is available open access under a cc by 4 0 license via link springer com

Il giorno piccolo monitore degli industriali, professionisti, artisti 1878

the extent to which firms can react creatively to rather than adjust passively against new techniques and practices is dependent on their command of technological knowledge and relative competence this book explores the characteristics of the path dependent dynamics of localized technological change demonstrating how the economics of complexity can inform our understanding of the economics of innovation and vice versa the book is structured in three parts part one focuses on the ingredients of the economics of localized technological change focusing on the legacies of the key economists and a critical

assessment part two explores the governance of the generation dissemination use and exploitation of localized technological knowledge part three elaborates on the basic dynamic mechanisms of localized technological change combining theory with specific empirical models the final perspectives articulate the relations between the economics of localized technological change the economics of path dependence and the challenge of the emerging economics of complexity

Monitore industriale italiano *2010-01-01*

this volume provides an overview of current research in the history of italian technology in the long run from the early middle ages to the 20th century the contributors focus on different aspects of italian creativity in a local transnational and global dimension tracing the trajectory from primacy to relative decline the themes range from the creation and establishment of new technologies in laboratories or enterprises the processes of learning diffusion and copying and the institutions involved in the generation of a national technological capability and innovation system comparative studies are included in order to illustrate special features of the italian case the industries covered in this volume range from silk iron and steel production to electricity generation and telecommunications special issue italian technology from the renaissance to the 20th century edited by anna guagnini and luca mola included in this volume inventors patents and the market for innovations in

renaissance italy the microcosm technological innovation and the transfer of mechanical knowledge in the habsburg empire of the sixteenth century diamonds in early modern venice technology products and international competition a global supremacy the worldwide hegemony of the piedmontese reeling technologies 1720s 1830s raw materials transmission of know how and ceramic techniques in early modern italy a mediterranean perspective anabaptist migration and the diffusion of the maiolica from faenza to central europe a bold leap into electric light the creation of the società italiana edison 1880 1886 keeping abreast with the technology of science the economic life of the physics laboratory at the university of padua 1847 1857 mechanics made in italy innovation and expertise evolution a case study from the packaging industry 1960 98 telecommunications italian style the shaping of the constitutive choices 1850 1914 beyond the myth of the self taught inventor the learning process and formative years of young guglielmo marconi technology transfer economic strategies and politics in the building of the first italian submarine telegraph lights and shades italian innovation across the centuries european steel vs chinese cast iron from technological change to social and political choices 4th century bc 18th century ad the italian national innovation system a long term perspective 1861 2011

Forms of Enterprise in 20th Century Italy

1922

by exploring the price dynamics and business cycle of the Italian economy with reference to the most important international events this text sheds new light on the country's current situation using a long term analytical framework underpinned by principal theoretical approaches the analysis places particular emphasis on price dynamics the text begins with the country's post war difficulties and then covers the boom and bust period of the Italian miracle before moving onto the lasting inflationary process of the 70s and 80s and finally the financial crisis of the 90s and the beginning of the new century the book also investigates the positive and negative aspects of policy measures an important implication of this approach is that it assesses the different evolutionary aspects of the Italian economic structure which in turn gives way to an analysis of the dynamic behaviour of policy makers and social partners

from a war torn and poverty stricken country regional and
predominantly agrarian to the success story of recent years Italy
has witnessed the most profound transformation economic social

and demographic in its entire history yet the other recurrent theme of the period has been the overwhelming need for political reform and the repeated failure to achieve it professor ginsborg's authoritative work the first to combine social and political perspectives is concerned with both the tremendous achievements of contemporary Italy and the continuities of its history that have not been easily set aside

The Cassa per il Mezzogiorno, the World Bank and the Model for Italian Economic Development 1988

this is an open access title available under the terms of a cc by nc nd 4.0 international licence it is free to read at oxford scholarship online and offered as a free pdf download from oup and selected open access locations ever since the industrial revolution of the late eighteenth and early nineteenth centuries industrialization has been the key to modern economic growth the fact that modern industry originated in Britain and spread initially to north western Europe and North America implied a dramatic divergence in living standards between the industrial north or west and a non industrial or even de industrializing south or rest this nineteenth century divergence which had profound economic military and geopolitical implications has been studied in great detail by many economists and historians today this divergence between the west and the rest is visibly unraveling

as economies in asia latin america and even sub saharan africa converge on the rich economies of europe and north america this phenomenon which is set to define the twenty first century both economically and politically has also been the subject of a considerable amount of research less appreciated however are the deep historical roots of this convergence process and in particular of the spread of modern industry to the global periphery this volume fills this gap by providing a systematic comparative historical account of the spread of modern manufacturing beyond its traditional heartland to southern and eastern europe the middle east asia africa and latin america or what we call the poor periphery it identifies the timing of this convergence finding that this was fastest in the interwar and post world war ii years not the more recent miracle growth years it also identifies which driving forces were common to all periphery countries and which were not
