crypto 96 the sixteenth annual crypto conference is sponsored by the international association for cryptologic research iacr in cooperation with the ieee computer society technical committee on security and p vacy and the computer science department of the university of california at santa barbara ucsb it takes place at ucsb from august 18 to 22 1996 the general chair richard graveman is responsible for local organization and registration the scientific program was organized by the 16 member program c mittee we considered 115 papers an additional 15 submissions had to be summarily rejected because of lateness or major noncompliance with the c ditions in the call for papers of these 30 were accepted for presentation in addition there will be five invited talks by ernest brickell andrew clark whitfield diffie ronald rivest and cliff stoll a rump session will be chaired by stuart haber these proceedings contain the revised versions of the 30 contributed talks least three com the submitted version of each paper was examined by at mittee members and or outside experts and their comments were taken into account in the revisions however the authors and not the committee bear full responsibility for the content of their papers

## Software User's Guide for the HAZARD I Fire Hazard Assessment Method

1983

the logic of manufacturing resource planning mrp ii is im plemented in most commercial production planning software tools and is commonly accepted by practitioners however these

peo ple are not satisfied with production planning and complain about long lead times high work in process and backlogging as many researchers have pointed out the reason for these shortcomings is inherent to the methods that are used the research community is thus eager to find more sophisticated approaches this book is an attempt to compile some state of the art work in the field of production planning research it includes mate rial that somehow dominates the existing mrp ii concept 15 ar ticles written by 36 authors from 10 countries cover many aspects related to mrp ii all papers went through a single blind refere eing process before they were selected for being published in this book when we received papers for this issue we discovered that mrp ii is a topic about which not only management scientists show interest as the list of authors proves industrial engineers computer scientists and operations researchers from academia as well as practitioners have contributed to this book this we hope makes the book of value for a broad audience we thank all authors who submitted papers and we are in debted to dr werner muller from springer for his support in this book project

2013-11-11

this book is the outcome of my research in the field of multi levellot sizing and scheduling which started in may 1993 at the christian albrechts university of kiel germany during this time i discovered more and more interesting aspects ab out this subject and i had to learn that not every promising idea can be thoroughly evaluated by one person alone nevertheless i am now in the position to present some results which are supposed to be useful for future endeavors since april 1995 the work was done with partial support from the research project no dr 170 4 1 from the deutsche for schungsgemeinschaft d fg the remaining space in this preface shah be dedicated to those who gave me valuable support first let me express my deep gratitude towards my thesis ad visor prof dr andreas drexl he certainly is a very outstanding advisor

without his steady suggestions this work would not have come that far despite his scarce time capacities he never rejected proof reading draft versions of working papers and he was always willing to discuss new ideas the good as weh as the bad ones he and prof dr gerd hansen refereed this thesis i am in debted to both for their assessment i am also owing something to dr knut haase since we al most never had the same opinion when discussing certain lot sizing aspects his comments and criticism gave stimulating input
