please note this is a companion version not the original book sample book insights 1 grants are hot right now but they are also extremely misunderstood people think that all you need to do to get grant money is to incorporate as a not for profit organization and wait for money to fall out of the sky 2 the world of grants is not like the lottery you have to be in it to win it but you also have to represent yourself and your organization in the best possible light if you can t do that then do not apply 3 the us department of education has funded parent centers in schools for more than 20 years these centers are supposed to be developed and run by parents but the types of activities available to parents are chosen by the department of education 4 there are three types of organizations grassroots small and large the kind of work you want to do and the size of your organization will determine where you should look for funding

described as ground breaking in kent mcneil s foreword this book develops an alternative approach to conventional aboriginal title doctrine it explains that aboriginal customary law can be a source of common law title to land in former british colonies whether they were acquired by settlement or by conquest or cession from another colonising power the doctrine of common law aboriginal customary title provides a coherent approach to the source content proof and protection of aboriginal land rights which overcomes problems arising from the law as currently understood and leads to more just results the doctrine s applicability in australia canada and south africa is specifically demonstrated while the jurisprudential underpinnings for the doctrine are consistent with fundamental common law principles the author explains that the australian high court s decision in mabo provides a broader basis for the doctrine a broader basis which is consistent with a re evaluation of case law from former british colonies in africa as well as from the united states new zealand and canada in this context the book proffers a reconceptualisation of the crown s title to land in former colonies and a reassessment of conventional doctrines including the doctrine of tenure and the doctrine of continuity with rare exceptions the existing literature does not probe as deeply or question fundamental assumptions as thoroughly as dr secher does in her research she goes to the root of the conceptual problems around the legal nature of indigenous land rights and their vulnerability to extinguishment in the former colonial empire of the crown this book is a formidable contribution that i expect will be influential in shifting legal thinking on indigenous land rights in progressive new directions from the foreword by professor kent mcneil to read the foreword please click on the sample chapter link
