A STEP BY STEP GUIDE TO PROFITABLE POULTRY FARMING FOR LOCAL CONSUMPTION AND EXPORT. An invaluable guide for farmers in poultry farming business. 1990 originally published in the early 1930s this extremely scarce early work on poultry keeping is both expensive and hard to find in its first edition we are now republishing it using the original text and photographs two hundred and thirty three pages deal with every aspect of poultry keeping from egg to table and will prove invaluable to both the backyard beginner and the larger commercial enterprise twenty detailed chapters contain much expert advice on the beginner breeds and strains houses and appliances foods and feeding hatching rearing backyard poultry keeping intensive poultry keeping winter egg production day old chicks ducks turkeys geese guinea fowls diseases of poultry vermin egg preserving killing and shaping plucking drawing trussing marketing accounts etc the book is well illustrated with photos of breeds and equipment this is a fascinating read for any poultry enthusiast and contains much information that is still useful and practical today many of the early farming books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive we are republishing these classic works in affordable high quality modern editions using the original text and artwork

Commercial Chicken Production Manual 2004 this book is a practical guide to help you stay away from synthetic drugs while maximizing the benefits of herbs roots and spices around you its content can help you go 100 organic in raising organic chickens if for any reason you cannot go 100 organic the book will help you substitute some drugs with herbs and spices that will give you outstanding results while saving you a lot of money the author has conducted a deep research in response to the disadvantages of antibiotics in chicken as a result the book your guide to organic poultry farming will help you to get rid of antibiotics on your farm yes you can get some knowledge about organic poultry farming in bits here and there but not to be compared to the full dose that you will get here if you ever want to be confident before you start knowing that you can always turn to a guide to see what and what you need to put together to tackle diseases this is it and before long you will master the art and become a good organic poultry farmer it is a practical step by step guide everyone can follow without a coach

Small-scale Poultry Production 2013-04-16 small scale poultry production is an obvious and well documented opportunity for poor farmers to start an income generating activity poultry are cheap easy to rear and easy to manage consequently there has been and there is a growing attention and interest in poultry production in villages as well as in peri urban and urban areas throughout the developing world however existing manuals and books either give advice on industrial production systems using

improved imported breeds under highly controlled conditions or very simple field guides giving little useful advice on how to rear poultry with profit in mind at village level this manual is based on existing knowledge on how to improve village poultry production systems with relatively few inputs this manual will exclusively deal with free range systems consisting of small flocks of indigenous chickens or their crosses and smallholder flocks of improved or hybrid commercial chickens poultry production can be divided into four sectors 1 industrial and integrated 2 commercial high biosecurity 3 commercial low biosecurity 4 village and family or backyard poultry the focus here is largely on sectors 3 and 4 but there may be some overlap family poultry as defined by the international network for family poultry development covers sectors 3 and 4 which encompass small scale poultry production there are numerous poultry handbooks which cover sectors 2 and 3 but this hand book has attempted in two manuals to cover mainly sector 3 while not ignoring the great importance of biosecurity particularly in the face of highly pathogenic avian influenza h5n1 it is envisaged that given time some producers now in sector 3 may move into sector 2 the two manuals are pitched at two different levels the trainer s instructor manual assumes that the trainer has qualifications and or experience in a branch of agricultural science but not necessarily in poultry production some of the material included is beyond that necessary to give an initial course in poultry production but may be useful as the farmer progresses from sector 3 to sector 2 the trainee s manual has numerous illustrations and is aimed at a lower level than for the trainer the farmer may be interested in starting a poultry enterprise or is already producing poultry in a small scale commercial or semi commercial opportunistic situation but would like to make poultry farming more permanent the course will allow the farmer to increase his her knowledge and skills and to become aware of a number of important issues e g managing the environment disease surveillance of his her enterprise in order to minimise repetition there is some material in the trainee s manual that is not in the trainer s manual trainers should familiarise themselves thoroughly with both manuals the third manual is for the millions of families worldwide in low income developing countries who keep backyard poultry mainly unmanaged with few inputs but nevertheless are of great importance by providing some security income and high quality protein it is hoped that this manual will make families aware of the possibility of improving output with a minimum of input much of the information has been taken from a range of sources as well as the author s own experience of working in several developing countries over 25 years ideally there should be a small scale demonstration unit or a poultry farm available so that the trainees can see first hand and better understand the main points in these manuals and observe how commercial poultry production should be practiced the importance of community poultry farming is seen as a critical step in alleviating poverty of household poultry keepers empowering women increasing income and moving from a scavenging system to one that is likely to be sustainable

Poultry Book - A Guide for Big or Small Poultry Keepers, Beginners and Farmers 1915 a project of the northeast organic farming association

Poultry for Profit 1970 describes equipment and procedures for rearing managing and breeding poultry and considers the preparation of chickens and eggs for use

Poultry Production in the Philippines 2020-02-08 excerpt from how to make poultry pay a practical manual the poultry rearing

industry ought to be one of the most profitable branches of agriculture in the british isles but owing chiefly to the lack of definite and accurate information on the subject poultry rearing does not pay in order to ascertain whether poultry farming could or could not be made to pay i devoted several months in 1902 to a close practical examination of the methods in vogue in most of the south of england counties after a thoroughly practical investigation i came to the conclusion that poultry farming could not be made to pay if conducted by the methods taught by the agricultural colleges and experimental farms about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
