Our Body 2006 how much do you know about your digestive system this fascinating book answers questions such as what happens to the food you swallow what does each type of food do for your body what happens when you vomit what does it look like inside the digestive system this book takes students right inside the body to find out how the digestive system works why things can go wrong and what you can do to stay healthy the our body series examines six of the human body systems special features in *Anatomy and Physiology* 2013-04-25 concepts of biology is designed for the single semester introduction to biology course for non science majors which for many students is their only college level science course as such this course represents an important opportunity for students to develop the necessary knowledge tools and skills to make informed decisions as they continue with their lives rather than being mired down with facts and vocabulary the typical non science major student needs information presented in a way that is easy to read and understand even more importantly the content should be meaningful students do much better when they understand why biology is relevant to their everyday lives for these reasons concepts of biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications

of the concepts at hand we also strive to show the interconnectedness of topics within this extremely broad discipline in order to meet the needs of today's instructors and students we maintain the overall organization and coverage found in most syllabi for this course a strength of concepts of biology is that instructors can customize the book adapting it to the approach that works best in their classroom concepts of biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand and apply key concepts

Concepts of Biology 2018-01-07 the secretions of the exocrine pancreas provide for digestion of a meal into components that are then available for processing and absorption by the intestinal epithelium without the exocrine pancreas malabsorption and malnutrition result this chapter describes the cellular participants responsible for the secretion of digestive enzymes and fluid that in combination provide a pancreatic secretion that accomplishes the digestive functions of the gland key cellular participants the acinar cell and the duct cell are responsible for digestive enzyme and fluid secretion respectively of the exocrine pancreas this chapter describes the neurohumoral pathways that mediate the pancreatic response to a meal

as well as details of the cellular mechanisms that are necessary for the organ responses including protein synthesis and transport and ion transports and the regulation of these responses by intracellular signaling systems examples of pancreatic diseases resulting from dysfunction in cellular mechanisms provide emphasis of the importance of the normal physiologic mechanisms

**Enzymes** 1998 biology for ap courses covers the scope and sequence requirements of a typical two semester advanced placement biology course the text provides comprehensive coverage of foundational research and core biology concepts through an evolutionary lens biology for ap courses was designed to meet and exceed the requirements of the college board s ap biology framework while allowing significant flexibility for instructors each section of the book includes an introduction based on the ap curriculum and includes rich features that engage students in scientific practice and ap test preparation it also highlights careers and research opportunities in biological sciences

**The Exocrine Pancreas** 2011 on july 9 10 2014 the institute of medicine s food forum hosted a public workshop to explore emerging and rapidly developing research on relationships among the brain the digestive system and eating behavior drawing on expertise from the
