Self Publishing 1996 the past two or three decades have seen many important advances in our knowledge of the chemistry physics geology and biology of the oceans it has also become apparent that in order to understand the manner in which the oceans work as a chemical system it is necessary to use a framework which takes account of these interdisciplinary advances

marine geochemistry has been written in response to the need for a single state of the art text that addresses the subject of treating the sea water sediment and rock reservoirs as a unified system in taking this approach a process orientated framework has been adopted in which the emphasis is placed on identifying key processes operating within the unified ocean in doing this particular attention has been paid to making the text accessible to students from all disciplines in such a way that future advances can readily be understood i would like to express my thanks to those people who have helped with the writing of this volume in particular i wish to put on record my sincere appreciation of extremely helpful suggestions made by professor john edmond frs in addition i thank dr s rowlatt for his comments on the sections covering the geochemistry of oceanic sediments and dr g wolff for his invaluable advice on the organic geochemistry of biota water and sediments it is a great pleasure to acknowledge the help of dr k j t
