modelled on the concept of industry 4 0 the idea of construction 4 0 is based on a confluence of trends and technologies that promise to reshape the way built environment assets are designed constructed and operated with the pervasive use of building information modelling bim lean principles digital technologies and offsite construction the industry is at the cusp of this transformation the critical challenge is the fragmented state of teaching research and professional practice in the built environment sector this handbook aims to overcome this fragmentation by describing construction 4

0 in the context of its current state emerging trends and technologies and the people and process issues that surround the coming transformation construction 4 0 is a framework that is a confluence and convergence of the following broad themes discussed in this book industrial production prefabrication 3d printing and assembly offsite manufacture cyber physical systems actuators sensors iot robots cobots drones digital and computing technologies bim video and laser scanning ai and cloud computing big data and data analytics reality capture blockchain simulation augmented reality data standards and interoperability and vertical and horizontal integration the aim of this handbook is to describe the construction 4 0 framework and consequently highlight the resultant processes and practices that allow us to plan design deliver and operate built environment assets more effectively and efficiently by focusing on the physical to digital transformation and then digital to physical transformation this book is essential reading for all built environment and aec stakeholders who need to get to grips with the technological transformations currently shaping their industry research and teaching

you can print from an iphone it s the dumbest thing bo fahs writer and host of tele friends from the moment we began to digitize our world we created machines that worked tirelessly to pull all that information zooming around back to the physical world enter the home printer perhaps as payback for forming a nonsensical dichotomy these printers couldn t just work not without a fight at least no they insisted on screeching at plane like decibels plopping out pages at an excruciatingly slow pace streaking only the most important documents and running out of ink when you know you just refilled

the cartridge from the first consumer inkjet to more modern monstrosities sh tty printers breaks down the worst offenders of our home offices featuring popular and exasperating home staples such as the hp thinkjet 2225a the lexmark z22 the long forgotten canon bjc 85 and many more each printer is beautifully photographed and ruthlessly torn to shreds as their individual strengths weaknesses and charisma are scored on sliding scales born from relatable frustration
