on march 21 1578 holy thursday cavalier fabrizio bracciolini charged that he had been ambushed slashed stoned and left bleeding in a pistoia street by fellow cavalier mariotto cellesi and four accomplices in the captain s concubine love honor and violence in renaissance tuscan donald weinstein studies the lengthy investigation of the incident bares the motives of the actors and follows the ensuing trial weinstein examines the roles of the patricians merchants shopkeepers weavers priests and prostitutes who served as audience bit players and chorus in this renaissance street theater drama when fabrizio is revealed to be the lover of chiara the concubine of mariotto s father questioning moves away from the street fight itself to the right of the defendants to take revenge for violated family honor accuser becomes accused and a simple case of assault turns into a community s discussion of its most tenacious values lurching from comedy to tragedy and neglected even by local chroniclers the holy thursday incident involved issues of honor family religion gender relations and power familiar to social historians of late medieval and early modern europe for the medici ruler of the grand duchy of tuscan the holy thursday affair presented a dilemma bound to regard duels and street fights as threats to an all too fragile public order and a challenge to his sovereignty francesco i nevertheless respected and fostered the aristocratic code of honor family loyalty and chivalric valor to which the cellesi appealed how these contradictions were accommodated is a crucial part of the story weinstein tells the byzantine world contained many important cities throughout its empire although it was not urban in the sense of the word today its cities played a far more fundamental role than those of its european neighbors this book through a collection of twenty four chapters discusses aspects of and different approaches to byzantine urbanism from the early to late byzantine periods it provides both a chronological and thematic perspective to the study of byzantine cities bringing together literary documentary and archival sources with archaeological results material culture art and architecture resulting in a rich synthesis of the variety of regional and sub regional transformations of byzantine urban landscapes organized into four sections this book covers theory and historiography geography and economy architecture and the built environment and daily life and material culture it includes more specialized accounts that address the centripetal role of constantinople and its broader influence across the empire such new perspectives help to challenge the historiographical balance between margins and metropolis and also to include geographical areas often regarded as peripheral like the coastal urban centers of the byzantine mediterranean as well as cities on islands such as crete cyprus and sicily which have more recently yielded well excavated and stratigraphically sound urban sites the routledge handbook of the byzantine city provides both an overview and detailed study of the byzantine city to specialist scholars students and enthusiasts alike and therefore will appeal to all those interested in byzantine urbanism and society as well as those studying medieval society in general a member of the art history generation from the golden age of the 1920s and 1930s millard meiss 1904 1975 developed a new and multi faceted methodological approach this book lays the foundation for a reassessment of this key figure in post war american and international art history the book analyses his work alongside that of contemporary art historians considering both those who influenced him and those who were receptive to his research jennifer cooke uses extensive archival material to give meiss the critical consideration that his extensive and important art historical restoration and conservation work deserves this book will be of interest to scholars in art history historiography and heritage management and conservation based on testaments and notarial contracts this examination of the black death of 1348 argues for social resilience in bologna the notarial record demonstrates that notaries officials medical practitioners and clergy served the populace while families remained intact and the populace resisted flight this mediterranean world during the archaic classical and hellenistic periods instead of traditional and static distinctions between greeks and others professor vlassopoulos explores the diversity of interactions between greeks and non greeks in four parallel but interconnected worlds the world of networks the world of apoikiai colonies the

panhellenic world and the world of empires these diverse interactions set into motion processes of globalisation but the emergence of a shared material and cultural koine across the mediterranean was accompanied by the diverse ways in which greek and non greek cultures adopted and adapted elements of this global koine the book explores the paradoxical role of greek culture in the processes of ancient globalisation as well as the peculiar way in which greek culture was shaped by its interaction with non greek cultures this book identifies through an interdisciplinary lens literary works that treat the theme of the journey from multiple angles religious psychological psychoanalytical philosophical educational and historical

italy s economic expansion after world war two triggered significant social and cultural change secularization accompanied this development and triggered alarm bells across the nation s immense catholic community the devil and the dolce vita is the story of that community the church of popes pius xii john xxiii and paul vi the lay catholic action association and the christian democratic party and their efforts in a series of culture wars to preserve a traditional way of life and to engage and tame the challenges of a rapidly modernizing society roy domenico begins this study during the heady days of the april 1948 christian democratic electoral triumph and ends when pro divorce forces dealt the catholics a defeat in the referendum of may 1974 where their hopes crashed and probably ended between those two dates catholics engaged secularists in a number of battles many over film and television censorship encountering such figures as roberto rossellini luchino visconti federico fellini and pier paolo pasolini the venice film festival became a locus in the fight as did places like pozzonovo near padua where the catholics directed their energies against a communist youth organization and prato in tuscany where the bishop led a fight to preserve church weddings concern with proper decorum led to more skirmishes on beaches and at resorts over modest attire and beauty pageants by the 1960s and 1970s other issues such as feminism a new frankness about sexual relations and the youth rebellion emerged to contribute to a perfect storm that led to the divorce referendum and widespread despair in the catholic camp major new study of secular religious boundaries and the role of the clergy in the administration of italy s late medieval city states more than 400 distinguished scholars including archaeologists art historians historians epigraphers and theologians have written the 1 455 entries in this monumental encyclopedia the first comprehensive reference work of its kind from aachen to zurzach paul corby finney s three volume masterwork draws on archaeological and epigraphic evidence to offer readers a basic orientation to early christian architecture sculpture painting mosaic and portable artifacts created roughly between ad 200 and 600 in africa asia and europe clear comprehensive and richly illustrated this work will be an essential resource for all those interested in late antique and early christian art archaeology and history provided by publisher in 1563 the council of trent published its decrees calling for significant reforms of the catholic church in response to criticism from both protestants and catholics alike bishops according to the decrees would take the lead in implementing these reforms they were tasked with creating a church in which priests and laity were well educated morally upright and focused on worshipping god unfortunately for these bishops the decrees provided few practical suggestions for achieving the wide ranging changes demanded reform was therefore an arduous and complex process which many bishops struggled to accomplish or even refused to undertake fully the bishop s burden argues that reforming bishops were forced to be creative and resourceful to accomplish meaningful change including creating strong diocesan governments reforming clerical and lay behavior educating priests and parishioners and converting non believers the book explores this issue through a detailed case study of the episcopacy of cardinal bishop gregorio barbarigo of padua bp 1664 1697 asking how a dedicated bishop formulated a reform program that sought to achieve the church s goals barbarigo like other reforming bishops borrowed strategies from a variety of sources in the absence of clear guidance from rome he looked to both pre and post tridentine bishops the society of jesus the venetian government and the propaganda fide which he selectively emulated to address the problems he discovered in padua the book is based primarily on the detailed records of barbarigo s visitations of rural parishes and captures the rarely heard voices of seventeenth century italian peasants the bishop s burden helps us understand not only the changes experienced by early modern catholics but also how even the most sophisticated plans of central authorities could be frustrated by practical realities which in turn complicates our understanding of state building and social control what is architectural history considers the questions and problems posed by architectural historians since the rise of the discipline in the late nineteenth century how do historians of architecture organise past time and relate it to the present how does historical evidence translate into historical narrative should architectural history be useful for practicing architects if so how leach treats the disciplinarity of architectural history as an open question moving between three key approaches to historical knowledge of architecture within art history as an historical specialisation and most prominently within architecture he suggests that the confusions around this question have been productive ensuring a rich variety of approaches to the project of exploring architecture historically read alongside introductory surveys of western and global architectural history this book will open up questions of perspective frame and intent for students of architecture art history and history graduate students and established architectural historians will find much in this book to fuel discussions over the current state of the field in which they work entirely original in
