Review of School Districts' 2014-15 Local Control and Accountability Plans

2015

to safeguard public health the us environmental protection agency epa must keep abreast of new scientific information and emerging technologies so that it can apply them to regulatory decision making for decades the agency has dealt with questions about what animal testing data to use to make predictions about human health hazards how to perform dose response extrapolations how to identify and protect susceptible subpopulations and how to address uncertainties as alternatives to traditional toxicity testing have emerged the agency has been faced with additional questions about how to incorporate data from such tests into its chemical assessments and whether such tests can replace some traditional testing methods endocrine active chemicals eacs have raised concerns that traditional toxicity testing protocols might be inadequate to identify all potential hazards to human health because they have the ability to modulate normal hormone function and small alterations in hormone concentrations particularly during sensitive life stages can have lasting and significant effects to address concerns about potential human health effects from eacs at low doses this report develops a strategy to evaluate the evidence for such low dose effects

Application of Systematic Review Methods in an Overall Strategy for Evaluating Low-Dose Toxicity from Endocrine Active Chemicals

companies can no longer expect to engage in dubious or unethical corporate behaviour without risking their reputation and damaging perhaps irrevocably their market position irresponsible corporate behavior not only deprives shareholders of long term returns but also ultimately imposes a cost on society as a whole sustainable business is about ensuring that entities contribute toward positive social environmental and economic outcomes bad business behaviour is costly for stakeholders for markets for society and the economy alike to ensure that a company behaves well the buy in of the leadership team is crucial the full commitment of the board of directors in conjunction with the senior managers of the organization is required if an organization is to be socially responsible in this sense leadership does not reside with an individual the ceo within the organization but with all of those at the apex of corporate power and control effective change management requires enlightened and capable leadership to

instigate and drive the process of embedding a sustainable and socially responsible corporate philosophy and culture that supports good business decision making a profound understanding of the requirements of such a leadership process will help corporate managers become highly effective change agents governance will be the main driver of this change for the economy and financial markets to become sustainable and resilient radical changes in corporate leadership need to take place integrated reporting government regulation and international standards will all be important factors in bringing about this change as well as understanding the effects of corporate behavior on financial markets such an understanding is also now imperative in relation to the social and environmental contexts

2018

get the focused foundation you need to successfully work with older adults occupational therapy with elders strategies for the cota 4th edition is the only comprehensive book on geriatric occupational therapy designed specifically for the certified occupational therapy assistant it provides in depth coverage of each aspect of geriatric practice from wellness and prevention to death and dying expert authors helene lohman sue byers connon and rené padilla offer an unmatched discussion of diverse populations and the latest on geriatric policies and procedures in this fast growing area of practice you will come away with a strong foundation in aging trends and strategies for elder care in addition to having a deep understanding of emerging areas such as low vision rehabilitation driving and mobility issues alzheimer s disease and other forms of dementia new technological advancements health literacy public policy dignity therapy and more plus you will benefit from 20 additional evidence briefs and numerous case studies to help apply all the information you learn to real life practice it s the focused evidence based and client centered approach that every occupational therapy assistant needs to effectively care for today s elder patients unique focus on the occupational therapy assistant highlights the importance of cotas to the care of elder clients unique attention to diverse populations and cultures demonstrates how to respect and care for clients of different backgrounds unique discussion of elder abuse battered women and literacy includes information on how the ota can address these issues that are often overlooked user resources on evolve feature learning activities to help you review what you have learned and assess your comprehension case studies at the end of certain chapters illustrate principles and help you understand content as it relates to real life situations multidisciplinary approach demonstrates the importance of collaboration between the ot and ota by highlighting the ota s role in caring for the elderly and how they work in conjunction with occupational therapists key terms chapter objectives and review questions are found in each chapter to help identify what information is most important new 20 additional evidence briefs have been added to reinforce this book s evidence based client centered approach new incorporation of emr prevalence and telehealth as a diagnostic and monitoring tool have been added throughout this new edition new expanded content on mild cognitive impairment health literacy and chronic conditions have been incorporated throughout the book to reflect topical issues commonly faced by ots and otas today new coverage of technological advancements has been incorporated in the chapter on sensory impairments new other updated content spans public policy hipaa power of attorney advanced directives alternative treatment settings dignity therapy and validation of the end of life new merged chapters on vision and hearing impairments create one sensory chapter that offers a thorough background in both areas

Obesity Medicine: Management of Obesity in Women's Health Care

2017-02-05

this volume provides a thoughtful and wide ranging exploration of approaches to the critical study of advertising current and impending practices of advertising have in many ways exceeded the grasp of traditional modes of critique due at least in part to their being formulated in very different historical conditions to begin to address this lag this edited collection explores through critical discussion and application a variety of critical approaches to advertising authors address a variety of concrete examples in their chapters drawing on existing research while presenting new findings where relevant in order to maintain the relevance of this collection past this particular historical moment however chapters do not simply report on empirical work but develop a theoretical argument

Global Environmental Constitutionalism in the Anthropocene

2016-09-22

the world's population is predicted to hit 9 billion by 2050 and with it food demand is predicted to increase substantially the world bank estimates that cereal and meat production needs to increase by 50 and 85 respectively between 2000 and 2030 to meet demand putting serious pressure on the global agricultural industry critical to meeting this demand for food are mechanisms to reduce the incidence of animal disease with in excess of 1.3 billion cattle globally the total cost of infectious diseases is difficult to estimate however in north america alone the cost is predicted to be 18 billion annually non infectious diseases also account for another major impediment to the production capacity and welfare of animals as well as the economic sustainability of farming however animal diseases have implications that spread far beyond the farm gate infectious agents can also contaminate the food chain and potentially affect human health controlling diseases through better preventative and treatment methods requires a detailed understanding of the immune response in livestock species multiple studies have identified associations between variation in immune genes and disease susceptibility which potentially opens up new avenues to select animals with superior disease resistance detailed understanding of immunity in cattle is leading to the design of more effective vaccines furthermore appreciation of the significant differences between rodent and human immune responses has also led to bovine models being developed for some human diseases the publication of the bovine genome and the advent of next generation sequencing technologies have facilitated a massive expansion in our knowledge of the immune response in cattle as a result there has been an explosion of exciting research findings including in metagenomics and epigenetics recently there has been a welcome move to integrate our emerging understanding of the immune response with detailed studies of other important physiological processes

including nutrition and reproduction the interactions between the reproductive system nutrition and the immune system are of particular interest since each places significant demands on the animal at various stages through the production cycle the interplay between these morphologically diffuse systems involves widely distributed chemical signals in response to environmental input and each system must interact for the normal functioning of the other a comprehensive systems approach is improving our understanding of normal physiological interactions between these systems and furthermore how dysregulation can lead to disease the successful translation of bovine immunological research into improved treatments for animal disease requires tight interaction between diverse scientific and clinical disciplines including immunology microbiology endocrinology physiology nutrition reproduction and clinical veterinary medicine with so much recent progress in the field we believe that it is valuable and well timed to review the broad variety of the relevant studies that attempt to increase our understanding through comprehensive collaboration between these disciplines we are looking forward to a wide and vivid discussion of developments in bovine immunology and related issues and we expect that our readers profoundly benefit from new exciting insights and fruitful collaborations

EU Leadership in Energy and Environmental Governance

2016-02-25

political change in switzerland explains the striking recent political developments in switzerland an important but surprisingly little known and often misunderstood country aiming to dissipate prevailing myths about switzerland in its european context firstly the title provides an analysis of the way the practice and processes of swiss politics have so dramatically changed over the last 25 years setting out the differences between outside perceptions and changing swiss realities secondly it discusses how far the country has moved from the stability of the post war period to a new era of uncertainty in which the so called sonderfall or special case no longer seems to apply in doing so it analyses the populist movement centred on the swiss people's party examining its support and tactical operations as well as the response of the establishment to the challenges the movement poses both generally and where key questions of policy on foreigners and the eu are concerned finally the title explains how much of this change is related to europe and discusses the prospects for switzerland europe and the eu member states in the light of this new swiss uncertainty the way in which globalization has imposed new stresses on switzerland both in external policy and social terms is the key theme of the title these stresses have in turn encouraged the growth of a new populist movement drawing on social classes previously supportive of other forces and employing aggressive new tactics creating a challenge that the establishment has found it hard to counter so that stability has been compromised as a result switzerland now faces two linked policy challenges to find ways of accommodating unease about immigration and to devise a realistic and widely acceptable new relationship with the eu the book's underlying belief is that these changes have left the country divided and uncertain about its

future this title offers in depth analysis of switzerland s domestic and european politics and policies it is also innovative in trying both to bring out the european roots of recent political changes in switzerland and of the challenges these pose to the swiss status quo and for the evolution of the eu and member states such as the united kingdom this is a book for those interested in switzerland academics business people diplomats journalists and political commentators

Occupational Therapy with Elders - eBook

2017-12-26

social justice transformation and knowledge policy workplace learning and skills examines the policy contexts in which lifelong learning vocational education and training and skill development is set it provides a critique of neo liberalism and its impact on vocational education and training and lifelong learning it interrogates potentially progressive policy interventions that take for granted capitalist relations as these can become a form of comfort radicalism that whilst calling for structural change remain lodged within capitalism such analyses are limited particularly in austere conditions of worklessness with increasing numbers of workers surplus to the requirements of capital offering detailed discussions within uk european and global contexts this book proves an insightful and critical text which illustrates professor avis extensive experience and knowledge of the field adopting a substantive focus on debates and analysis with significance that extends beyond the particular policy context of england the book offers an exploration of arguments that suggest workplace learning carries with it progressive possibilities an examination of models of class implicit within education policy and documents consideration of forms of governance and professionalism and their articulation to the pursuit of social justice an insight into discussions concerned with social justice knowledge as well as the current conditions of austerity in which education and social policy are emphasised social justice transformation and knowledge is a significant addition to the field it is an insightful and thought provoking book from which students lecturers and researchers with an interest in education studies education policy and social justice will greatly benefit from reading
