course

## **Study Guide to Accompany McConnell and Brue Microeconomics 1999**

climate change is the most important ethical problem humanity is  
facing right now we are in the process of harming the earth in  
ways that will diminish the quality of life for many future  
generations our old human centrism our national tribalism and our  
short term perspectives must give way to new ways of thinking  
that give moral standing to other animals and that take global and  
long term perspectives in the year 3000 humankind will look back  
to the present century which dramatically altered the planet s  
climate and ecosystems will they curse us as destroyers of the

earthly paradise humankind enjoyed until now to avoid this we need to change our approach to ethics economics sustainability politics and law earthling a new ethics for the anthropocene addresses sustainability economics politics and law as important factors in climate ethics it aims to both help with understanding these issues and present potential solutions for the problem
