international criminal justice relies on messages speech acts and performative practices in order to convey social meaning major criminal proceedings such as nuremberg tokyo and other post world war ii trials have been branded as spectacles of didactic legality however the expressive and communicative functions of law are often side lined in institutional discourse and legal practice this innovative work brings these functions centre stage developing the idea of justice as message and outlining the expressivist foundations of international criminal justice in a systematic way professor carsten stahn examines the origins of the expressivist theory in the sociology of law and the justification of punishment its articulation in practice and its broader role as method of international law he shows that expression and communication is not only an inherent part of the punitive functions of international criminal justice but is represented in a whole spectrum of practices norm expression and diffusion institutional actions performative aspects of criminal procedures and repair of harm he argues that expressivism is not a classical justification of justice or punishment on its own but rather a means to understand its aspirations and limitations to explain how justice is produced and to ground punishment rationales this book is an invitation to think beyond the confines of the legal discipline and to engage with the multidisciplinary foundations and possibilities of the international criminal justice project

by c a bayly and d h a kolff the papers published in this volume were originally presented at two meetings of the cambridg leiden group for the comparative study of colonial india and indonesia held in june 1979 and september 1982 these meetings were jointly sponsored by the centre for the history of european expansion at leiden and the centre for south asian studies at cambridge the cambridge centre had been restricted to the study of india pakistan sri lanka burma and nepal but had recently incorporated southeast asia into its area of interest the leiden centre which had encouraged comparative study from the beginning necessarily found itself concentrating attention on indonesia as the most important region of the former dutch colonial empire the meetings were intended to be exploratory as much to alert the participants to work being done in the respective countries and to

their different types of academic discourse as to compare india and indonesia nor were the meetings intended to be exclusive scholars from several british and netherlands universities were involved from the beginning more recently a wider series of conferences has been inaugurated this brings scholars in india and indonesia into a project wich seeks to develop the comparisons between the two colonial societies on a more systematic basis

in 1876 in a mountainous region to the west of lake victoria africa what is today ruwenzori mountains national park in uganda the famed explorer henry morton stanley encountered africans with what he was convinced were light complexions and european features stanley's discovery of this african white tribe haunted him and seemed to substantiate the so called hamitic hypothesis the theory that the descendants of ham the son of noah had populated africa and other remote places proving that the source and spread of human races around the world could be traced to and explained by a biblical story in the lost white tribe michael robinson traces the rise and fall of the hamitic hypothesis in addition to recounting stanley's discovery robinson shows how it influenced encounters with the ainu in japan vilhjalmur stefansson's tribe of blond eskimos in the arctic and the white indians of panama as robinson shows race theory stemming originally from the bible only not only guided exploration but archeology including charles mauch's discovery of the grand zimbabwe site in 1872 and literature such as h rider haggard's king solomon's mines whose publication launched an entire literary subgenre dedicated to white tribes in remote places the hamitic hypothesis would shape the theories of carl jung and guide psychological and anthropological notions of the primitive the hypothesis also formed the foundation for the european colonial system which was premised on assumptions about racial hierarchy at whose top were the white races the purest and oldest of them all it was a small step from the hypothesis to theories of aryan superiority which served as the basis of the race laws in nazi germany and had horrific and catastrophic consequences though racial thinking changed profoundly after world war two a version of hamitic validation of the whiter tribes laid the groundwork for conflict within africa itself after decolonization including the rwandan genocide based on painstaking archival research the lost white tribe is a fascinating immersive and wide ranging work of synthesis revealing the roots of racial thinking and the legacies that continue to exert their influence to this day

traducción parcial de la introducción en la actualidad la evaluación de la investigaciones es una cuestión que se está replanteando en todo el mundo en algunos casos los trabajos de investigación están generando resultados muy buenos en la mayoría de los casos los resultados son mediocres y en algunos casos negativos por todo esto la evaluación de los resultados de la investigación se convierte en una condición sine qua non cuando el número de investigadores eran menos eran los propios colegas de profesión quienes evaluaban la investigación con el paso del tiempo el número de investigadores aumentó las áreas de investigación proliferaron los resultados de la investigación se multiplicaron la tendencia continuó y después de la segunda guerra mundial la investigación comenzó a crecer exponencialmente hoy en día incluso en una estimación moderada hay alrededor de más de un millón de investigadores y producen más de dos millón de trabajos de investigación y otros documentos por año en este contexto la evaluación de la investigación es una cuestión de primera importancia para cualquier promoción acreditación premio y beca puede haber decenas o cientos de nominados de entre éstos seleccionar el mejor candidato es una cuestión difícil de determinar las evaluaciones inter pares en muchos casos están demostrando ser subjetivas en 1963 se crea science citation index sci que cubre la literatura científica desde 1961 unos años después eugene garfield fundador del sci preparó una lista de los 50 autores científicos más citados basándose en las citas que recibía el trabajo de un autor por parte de los trabajos de otros colegas de investigación el

documento titulado pueden predecirse los ganadores del premio nobel fue publicado en 1968 garfield y malin 1968 en el siguiente año es decir 1969 dos científicos que figuran en la lista por ejemplo derek hr barton y murray gell mann recibieron el codiciado premio esto reivindicó la utilidad del análisis de citas cada año varios científicos pertenecientes al campo de la física química fisiología y medicina reciben el premio nobel de esta manera el análisis de citas se convirtió en una herramienta útil sin embargo el análisis de citas siempre tuvo críticas y múltiples fallas incluso garfield comentó el uso del análisis de citas de los trabajos de evaluación es una tarea difícil existen muchas posibilidades de error garfield 1983 para la evaluación de la investigación se necesitaban algunos otros indicadores el análisis de citas junto con la revisión por pares garantiza el mejor juicio en innumerables casos pero se necesita algo que sea más exacto la llegada de la world wide web brindó la oportunidad pues un buen número de indicadores se están generando a partir de los datos disponibles en la web trad julio alonso arévalo univ salamanca
