this is the first book to deal with the jewish thought of leo strauss known primarily as one of the leading contemporary political thinkers this book reveals another side of leo strauss as one of the most important jewish thinkers of the present century the author presents the jewish thought of leo strauss as powerful original and provocative but also as essential for grasping the true character of strauss s thought his jewish thought may prove to be the key to the proper understanding of his philosophic thought as a whole

Salafi-jihadism

2016

no topic has captured the public imagination of late quite so dramatically as the specter of global jihadism while much has been said about the way jihadists behave their ideology remains poorly understood as the levant has imploded and millenarian radicals claim to have revived a caliphate based on the teachings of the prophet mohammed the need for a nuanced and accurate understanding of jihadist beliefs has never been greater shiraz maher charts the intellectual underpinnings of salafi jihadism from its origins in the mountains of the hindu kush to the jihadist insurgencies of the 1990s and the 9 11 wars what emerges is the story of a pragmatic but resilient warrior doctrine that often struggles as so many utopian ideologies do to consolidate the idealism of theory with the reality of practice his ground breaking introduction to salafi jihadism recalibrates our understanding of the ideas underpinning one of the most destructive political philosophies of our time by assessing classical works from islamic antiquity alongside those of contemporary ideologues packed with refreshing and provocative insights maher explains how war and insecurity engendered one of the most significant socio religious movements of the modern era

during and especially after the second world war a group of leading scholars who had been perilously close to the war s devastation joined others fortunate enough to have been protected by distance in an effort to redefine and reinvigorate western liberal ideals for a radically new age treating evil as an analytical category they sought to discover the sources of twentieth century horror and the potentialities of the modern state in the wake of western desolation in the process they devised strikingly new ways to understand politics sociology and history that reverberate still in this major intellectual history ira katznelson examines the works of hannah arendt robert dahl richard hofstadter harold lasswell charles lindblom karl polanyi and david truman detailing their engagement with the larger project of reclaiming the west s moral bearing in light of their epoch s calamities these intellectuals insisted that the tradition of enlightenment thought required a new realism a good deal of renovation and much recommitment this array of historians political philosophers and social scientists understood that a simple reassertion of liberal modernism had been made radically insufficient by the enormities and moral catastrophes of war totalitarianism and holocaust confronting their period s dashed hopes for reason and knowledge they asked not just whether the enlightenment should define modernity but which enlightenment we should wish to have decades later in the midst of a new type of war and reanimated discussions of the concept of evil we share no small stake in assessing their successes and limitations

bridges western and non western political thought to address the problem of democracy and political decadence in contemporary iran and by implication similar islamic societies political decay in islamic societies has for the most part been the subject of structural analyses while philosophical studies have been rare often speculative and deterministic thoughtlessness and decadence in iran explores from a theoretical perspective the problem of democracy deficit or political decadence in contemporary iran and by implication in present day middle eastern societies this decadence the book argues is in part a religion based decadence and deliverance from it requires collective thoughtfulness about religion alireza shomali conceptualizes the iranian reality in terms of a lack of not only good life but also thinking of good living this thoughtlessness means dissolution of critical consciousness and as such it heralds escalating decadence at this moment of rapid decay the book argues thought must become relevant to society the communicative practice of thinking must emerge to examine the pathologies of a religiously administrated life opening a dialogue between adorno strauss farabi and razi among others shomali underlines the critical points of similarity and difference between these thinkers and envisions a local emancipatory project that noting the specifics of the iranian case takes lessons from the western experience without blind imitation alireza shomali is associate professor of political science at wheaton college he is the author of politics and the criteria of truth

this book reprints human guinea pigs by kenneth mellanby a seminal work in the history of medical ethics and human subject research that has been nearly unavailable for over 40 years detailing the use of world war ii conscientious objectors who volunteered for experimentation on scabies transmission mellanby s book offers insight into one approach to human subject experimentation before the development of ethical oversight regulations his work was initially published prior to the articulation of the nuremberg code which makes his subsequent position as a reporter for the british medical journal at the nuremberg trials very interesting particularly given his sometimes controversial opinions on nazi medical experimentation this book reprints the second edition together with commentary essays that situate mellanby s ethical approach in historical context and relative to contemporary approaches this volume is of particular interest to scholars of the history of human subject research

this book examines how the contemporary indian situation poses a strict theoretical challenge to habermas s theorization of the public sphere and employs the method of samvāda to critically analyse and dissect its universalist claims it invites the reader to consider the possibility of imagining a normative indian public sphere that is embedded in the indian context in a native and not nativist sense to get past the derivative language of philosophical and political discourses prevalent within indian academia the book proposes that the dynamic cooperative space between indian political theory and contemporary indian philosophy is effectively suited to theorize the native idea of the indian public sphere it underlines the normative need for a natively theorized indian public sphere to further the multilayered democratization of public spheres within diverse communities that constitute indian society the book will be a key read for contemporary studies in philosophy political theory sociology postcolonial theory history and media and communication studies

blurb kenneth whiting was well known in the navy of his day during his early years after graduating from the naval academy he commanded several early submarines and was known as the first man to escape from a downed submarine after being trained to fly by orville wright he was the first naval officer to conceptualize a ship that was to become the most important in the us navy the aircraft carrier after submitting his first three unsuccessful proposals to build such a ship his creativity and aggressiveness were recognized at the start of world war i when he was asked to lead the navy s first aeronautical detachment to france the fad was the first american unit to travel to europe and within a few months he negotiated a plan with the french navy for a system to build naval air stations and train his men in anti submarine warfare from the air when the us navy department approved the plan he was transferred to the command of nas killingholme on england s north sea coast he built killingholme into the largest naval air station in britain returning to the us at the end of the war he found the navy department much more willing to talk about building aircraft carriers upon the approval of this new ship type he was placed in charge of converting or building the first six along the way he developed the new systems for the operation of launching and landing aircraft on the new flat flight decks for his developmental work with the first six carriers and commanding two of them he is frequently called the father of the aircraft carrier in books and publications about the ship which was to take the place of the battleship as the king of the seas along the way naval aviation took advantage of his ability to effectively and smoothly advocate for many of the then fledgling

naval aviation's important goals in the public arena because he had publicly spearheaded much of those goals the battleship admirals who ran the navy of that era were able to take revenge on him and prevent him from being promoted to admiral rank his tragic death in the middle of world war ii became part of the reason his name has been largely forgotten outside the navy but naval aviators know him because the field where they are all trained Whiting Field NAS in Pensacola is named for him the military exploits of this american sailor are worth recounting but the victories of Whiting and his family racing yachts on Long Island Sound make him even more interesting the goal of this first biography of Kenneth Whiting is to enable those who empower one of today's most important functions naval aviation and the americans who have benefitted from Whiting's work to remember this hero of naval aviation and submarines

how nations move from war to peace is the world destined to suffer endless cycles of conflict and war can rival nations become partners and establish a lasting and stable peace how enemies become friends provides a bold and innovative account of how nations escape geopolitical competition and replace hostility with friendship through compelling analysis and rich historical examples that span the globe and range from the thirteenth century through the present foreign policy expert charles kupchan explores how adversaries can transform enmity into amity and he exposes prevalent myths about the causes of peace kupchan contends that diplomatic engagement with rivals far from being appeasement is critical to rapprochement between adversaries diplomacy not economic interdependence is the currency of peace concessions and strategic accommodation promote the mutual trust needed to build an international society the nature of regimes matters much less than commonly thought countries including the united states should deal with other states based on their foreign policy behavior rather than on whether they are democracies kupchan demonstrates that similar social orders and similar ethnicities races or religions help nations achieve stable peace he considers many historical successes and failures including the onset of friendship between the united states and great britain in the early twentieth century the concert of europe which preserved peace after 1815 but collapsed following revolutions in 1848 and the remarkably close partnership of the

soviet union and china in the 1950s which descended into open rivalry by the 1960s in a world where conflict among nations seems inescapable how enemies become friends offers critical insights for building lasting peace

recovering international relations bridges two key divides in contemporary ir between value free and normative theory and between reflective philosophically inflected explorations of ethics in scholarship and close empirical studies of practical problems in world politics featuring a novel provocative and detailed survey of ir s development over the second half of the twentieth century the work draws on early frankfurt school social theory to suggest a new ethical and methodological foundation for the study of world politics sustainable critique which draws these disparate approaches together in light of their common aims and redacts them in the face of their particular limitations understanding the discipline as a vocation as well as a series of academic and methodological practices sustainable critique aims to balance the insights of normative and empirical theory against each other each must be brought to bear if scholarship is to meaningfully and responsibly address an increasingly dense heavily armed and persistently diverse world

ralph ellison and kenneth burke focuses on the little known but important friendship between two canonical american writers the story of this fifty year friendship however is more than literary biography bryan crable argues that the burke ellison relationship can be interpreted as a microcosm of the american racial divide through examination of published writings and unpublished correspondence he reconstructs the dialogue between burke and ellison about race that shaped some of their most important works including burke s a rhetoric of motives and ellison s invisible man in addition the book connects this dialogue to changes in american discourse about race crable shows that these two men were deeply connected intellectually and personally but the social division between white and black americans produced hesitation embarrassment mystery and estrangement where ellison and burke might otherwise have found unity by using ellison s nonfiction and burke s rhetorical theory to articulate a new vocabulary of race the author concludes not with a simplistic healing of the divide but with a challenge to embrace the responsibility inherent to our social order american literatures initiative

since world war i when the movement toward a comprehensive and systematic examination of international relations began two intensive debates about the nature and methodology of the discipline have helped shape the field the first was between the realist and the idealist schools the second between the traditionalists and the behavioralists now a third debate has emerged pitting state centric conceptualizations against the globalist focus on interdependence at issue is the nature of the international system is it still one in which the sovereign nation state constitutes the dominant actor or has a process of global political economic and even social integration transformed the world into a global village this text presents seminal works that define and illuminate the third debate focused by the editors comments prefacing each chapter and their synthesizing introductory and concluding chapters it is designed to allow students and scholars to compare and contrast the contending approaches in order to better understand and develop the discipline of international relations given the consensus among both realists and globalists that our assumptions about world affairs affect how we construct theories to explain events and that the model we impose on the world directly affects the policies we prescribe it is difficult to overemphasize the importance of the subject
