~~erucial element in responses to new global challenges such as~~
climate change sustainable growth and resource productivity
analyses raw materials supply and resource use in a global
context the contributions present state of the art results and
perspectives on the availability of resources and discuss factors
such as limited supply demand from emerging and other
economies and the critical shortage of some materials
particularly some metals that are essential inputs in many high
tech processes and may put certain industries at risk sustainable
growth and resource productivity sheds new light on the
economics of sustainable growth linking the current financial
crisis with stock market pricing and innovation dynamics it
argues for reforms in international macro economic policies it
also critically discusses the implications of valuing labour
productivity over capital and resource productivity and argues
that policies favouring capital productivity will increase both
social and economic sustainability further contributions are
made on the business dimensions of material efficiency as well as
on policy recommendations the book examines the overall
empirical trend towards decoupling resource use from economic
growth it undertakes a rigorous cross country comparison and
looks in more detail at the cases of finland and greece as well as
at emerging economies and their role in the global governance of
natural resources a key focus is placed on china with discussion
of recent findings regarding chinese domestic policy on energy
climate and resources as well as on developing chinese foreign
policy in africa the book concludes with the positing of a new
theory of resource economics an emerging sub discipline that
puts resources at its heart but clearly aligns with other fields of
economics and transcends the borderlines of geology geography
material science recycling and waste as well as elements of other
social sciences this important new book will be essential reading
for economic researchers governmental officials businesses and
ngos with an interest in understanding the policy links to
sustainable growth and in learning more about the emerging
field of resource productivity
