for decades traditional medicine had very little to offer for individuals suffering from multiple sclerosis and other autoimmune diseases today medical science has brought us wave upon wave of immunomodulatory medications to try to slow disease progression unfortunately these medications come with their own health and life threatening side effects and sometimes they just stop working fighting the dragon how i beat multiple sclerosis is the story of one woman s thirty year battle with multiple sclerosis and what she did to reclaim her life when she realized she would need an assisted living facility within a few years the book contains detailed descriptions of what worked and what did not where she got the help she needed and how the reader can locate these resources within his her own community and the logic behind the non conventional therapies fighting the dragon is a narrative of courage courage driven by desperation a story written by a patient who decided when her neurologist told her you will never walk normally again that she would dance fighting the dragon is also a book the ms patient can take to his her physician it contains well researched easy to follow guidelines for what to do and how the information is also applicable to a wide range of other autoimmune conditions cancers and aids excerpt if your car kept breaking down and the mechanic you took it to kept doing the same thing to fix it but it did not stay fixed you would question the mechanic s competence maybe the mechanic pulled out a technical manual see i fixed it exactly as the manual said this is the industry approved way to solve this problem when the car broke down again a week later would you be satisfied probably not you might decide it is time to replace the car but that might be too expensive so what to do if you were smart you would probably try to find a new mechanic you might ask your friends who they would recommend you might search on the internet to see if other people had the same experience with their cars and what caused the problem you might telephone some repair shops to get some idea of what they thought the problem might be if you found a new mechanic and that mechanic looked over the car and said i have a solution that is not in any industry approved repair manuals but it is safe and it works would you walk away and go back to the first mechanic who never got it right why is your health worth any less than your car

in print for more than 50 years Krause's Food Nutrition Therapy has been recognized internationally as the most authoritative text on nutrition. This new edition continues its tradition of providing the most comprehensive and up-to-date content available today. New chapters on medical nutrition therapy for psychiatric disease and developmental disorders spotlight the advances made in these areas. Extensive appendices, tables, illustrations, figures, and clinical insight boxes give practical hands-on procedures and clinical tools with the most current information, including brand new guidelines on food intake and physical activity and highlight the inclusion of the new Food Guide Pyramid. MyPyramid to Use in Everyday Practice, edited by two leading experts in nutrition, Kathleen Mahan and Sylvia Escott Stump, and written by nationally recognized contributors to ensure that all information is comprehensive and current. Hundreds of full-color illustrations bring nutrition therapy to life and provide a realistic representation of clinical practice. Unique pathophysiology algorithms present the cause, pathophysiology, and the medical nutrition management for a variety of disorders and conditions, helping you better understand the illness process and provide optimum nutritional care. Clinical insight, new directions, and focus on boxes provide additional information and suggest further discussion, study, or research. Clinical scenarios offer case studies that help you apply what you've learned to real-world situations. Relevant websites direct you to online resources for further information on specific chapter topics. Key terms are defined at the beginning of each chapter and highlighted within the text to help you focus your study and test your mastery of the information. Evolve Student Resource contains weblinks and more than 1,000 self-assessment study questions that provide instant feedback. Medical Nutrition Therapy for Psychiatric Conditions chapter explores recent research into the links between nutrition and mental disorders such as Alzheimer's disease, anxiety disorder, bipolar disorder, dementia, depression, and schizophrenia.
