the senegalese slave liberations project led by professors richard roberts joel cabrita and fatoumata seck at stanford babacar fall and ibrahima seck in senegal and rebecca wall at hamilton college together with joshua goodwin at stanford and erica ivins at columbia university is investigating slavery and freedom in 19th century west africa stanford graduate school of education enroll now format online self paced coursera paid after free trial notes course format each week there will be a series of short lectures followed by interactive assessments that refer to the weekly readings on an organizational theory and case the stanford decision analysis group has been pioneering decision analysis research since the 60s our goal is to promote research on decision analysis voluntary social systems and ethical analysis for more on decision quality you can go to the website of decision education foundation earn a decision analysis graduate certificate from stanford learn to make decisions using probabilistic risk analysis case studies mathematical modeling decisions made at many levels can have a profound effect on the outcome of a company in this course we will use organizational theories to systematically analyze how an organization operates and can best be managed organizational theories highlight certain features of an organization s structure and environment as well as its processes of negotiation production and change analysis and pde are a major strength of stanford s department of mathematics with strong connections to geometry and applied mathematics since pde describe fundamental aspects of these fields analysis first published mon apr 7 2003 substantive revision wed mar 19 2014 analysis has always been at the heart of philosophical method but it has been understood and practised in many different ways algorithms design and analysis part 1 soe ycsalgorithms1 stanford school of engineering enroll now format online self paced edx notes stanford courses offered through coursera are subject to coursera s pricing structures apr 8 jun 9 2024 enroll now format online instructor led time to complete 8 weeks 9 15 hrs week tuition 4 368 00 schedule jun 24 aug 17 2024 academic credits 3 units credentials stanford university transcript programs data mining and applications graduate certificate statistics graduate certificate economic analysis policy our doctoral program in the field of economic analysis and policy prepares students for research careers in economics the program offers rigorous training and has several distinct advantages low student to faculty ratio first enrollment in the program is small program overview the m s in statistics and data science are terminal degree programs that are designed to prepare individuals for career placement following degree completion a conferred bachelor s degree with an undergraduate gpa of 3 2 or better earn a financial analytics graduate certificate from stanford and gain a theoretical practical framework to solve real world problems in the finance field the syllabus includes linear and polynomial regression logistic regression and linear discriminant analysis cross validation and the bootstrap model selection and regularization methods ridge and lasso nonlinear models splines and generalized additive models tree based methods random forests and boosting support vector machines 2022 working papers it is surprisingly difficult to measure income segregation josh leung gagne sean f reardon 2022 see more research in poverty and inequality we re the 1 education policy program in the nation stanford s introduction to statistics teaches you statistical thinking concepts that are essential for learning from data and communicating insights by the end of the course you will be able to perform exploratory data analysis understand key principles of sampling and select appropriate tests of significance for multiple contexts the modeling and analysis of probabilistic systems involve the fields of probability theory statistics machine learning and statistical signal processing this course covers the basic concepts and techniques of probability theory with applications to statistics machine learning and statistical signal processing course overview introduction to fundamental techniques for designing and analyzing algorithms including asymptotic analysis divide and conquer algorithms and recurrences greedy algorithms data structures dynamic programming graph algorithms and randomized algorithms required textbook kleinberg and tardos algorithm design 2005 statistics minor complements degree programs in computer science economics and the social and natural sciences data science minor gain practical knowledge of statistical data analytic methods as it relates to their major or field of interest back to top design and analysis of algorithms stanford university winter 2024 instructors nima anari and moses charikar time mon wed 10 30 am 12 00 pm location skilling auditorium course description this course will cover the basic approaches and mindsets for analyzing and designing algorithms and data structures
