marine extremes as they are conceived of in this volume encompass environments activities events and impacts extreme environments found in and around our oceans including the deep sea and seabed as well as the frozen polar regions are being seriously affected by both extreme behaviours dumping and discharge of waste illegal fishing and piracy and extreme events storms tsunamis extreme waves and marine heatwaves the aim of this book is to highlight the multi disciplinary knowledge and inputs needed to address marine extremes and thereafter to explore opportunities and current challenges safe and healthy oceans are important for economic recreational and cultural activities in addition to the maintenance of ecosystem services upon which we rely this volume gathers a unique mix of researchers working on scientific aspects of biological ecosystems and physical processes together with social scientists exploring law and governance options community preferences cultural values economic aspects and criminological drivers and approaches the multi disciplinary feature of this book breaks down barriers that arise between disparate fields of research so that integrated solutions to ocean challenges can be found overall this book argues that if we are to achieve sustainable utilisation of our oceans and blue economy goals we must better understand and respond to the extreme environments activities events and impacts the book is a valuable addition to the literature and will be of interest to researchers in marine science ocean governance and natural resource economics as well as to professionals and government officials concerned with marine policy and planning

A Critical Dictionary of English Literature and British and American Authors

1897

modern humanity with some 5 000 years of recorded history has been experiencing growing pains with no end in sight it is high time for humanity to grow up and to transcend itself by embracing transhumanism transhumanism offers the most inclusive ideology for all ethnicities and races the religious and the atheists conservatives and liberals the young and the old regardless of socioeconomic status gender identity or any other individual qualities this book expounds on contemporary views and practical advice from more than 70 transhumanists astronaut neil armstrong said on the apollo 11 moon landing in 1969 one small step for a man one giant leap for mankind transhumanism is the next logical step in the evolution of humankind and it is the existential solution to the long term survival of the human race

1881

neutrosophic sets and systems has been created for publications on advanced

studies in neutrosophy neutrosophic set neutrosophic logic neutrosophic probability neutrosophic statistics that started in 1995 and their applications in any field such as the neutrosophic structures developed in algebra geometry topology etc

A Critical Dictionary of English Literature and British and American Authors Living and Deceased from the Earliest Accounts to the Latter Half of the Nineteenth Century by S. Austin Allibone

1870

this book includes review articles in the field of elliptic integrals elliptic functions and modular forms intending to foster the discussion between theoretical physicists working on higher loop calculations and mathematicians working in the field of modular forms and functions and analytic solutions of higher order differential and difference equations

A Critical Dictionary of English Literature, and British and American Authors, Living and Deceased, from the Earliest Accounts to the Middle of the Nineteenth Century

1870

an elegant engrossing carol tavis wall street journal examination of what we think we know about the brain and why despite technological advances the workings of our most essential organ remain a mystery i cannot recommend this book strongly enough henry marsh author of do no harm for thousands of years thinkers and scientists have tried to understand what the brain does yet despite the astonishing discoveries of science we still have only the vaguest idea of how the brain works in the idea of the brain scientist and historian matthew cobb traces how our conception of the brain has evolved over the centuries although it might seem to be a story of ever increasing knowledge of biology cobb shows how our ideas about the brain have been shaped by each era s most significant technologies today we might think the brain is like a supercomputer in the past it has been compared to a telegraph a telephone exchange or some kind of hydraulic system what will we think the brain is like tomorrow when new technology arises the result is an essential read for anyone interested in the complex processes that drive science and the forces that have shaped our marvelous brains

Marine Extremes

the seven volume set of Incs 11301 11307 constitutes the proceedings of the 25th international conference on neural information processing iconip 2018 held in siem reap cambodia in december 2018 the 401 full papers presented were carefully reviewed and selected from 575 submissions the papers address the emerging topics of theoretical research empirical studies and applications of neural information processing techniques across different domains the 4th volume Incs 11304 is organized in topical sections on feature selection clustering classification

and detection

The Transhumanism Handbook

2019-07-03

drawing on global empirical evidence li offers a novel explanation to the age old puzzle of why some countries thrive despite corruption

Neutrosophic Sets and Systems

2019-01-30

examines the advantages of embedded and fo wlp technologies potential application spaces package structures available in the industry process flows and material challenges embedded and fan out wafer level packaging fo wlp technologies have been developed across the industry over the past 15 years and have been in high volume manufacturing for nearly a decade this book covers the advances that have been made in this new packaging technology and discusses the many benefits it provides to the electronic packaging industry and supply chain it provides a compact overview of the major types of technologies offered in this field on what is available how it is processed what is driving its development and the pros and cons filled with contributions from some of the field s leading experts advances in embedded and fan out wafer level packaging technologies begins with a look at the history of the technology it then goes on to examine the biggest technology and marketing trends other sections are dedicated to chip first fo wlp chip last fo wlp embedded die packaging materials challenges equipment challenges and resulting technology fusions discusses specific company standards

and their development results content relates to practice as well as to contemporary and future challenges in electronics system integration and packaging advances in embedded and fan out wafer level packaging technologies will appeal to microelectronic packaging engineers managers and decision makers working in oems idms ifms osats silicon foundries materials suppliers equipment suppliers and cad tool suppliers it is also an excellent book for professors and graduate students working in microelectronic packaging research

Elliptic Integrals, Elliptic Functions and Modular Forms in Quantum Field Theory

2020-04-21

this report aims to provide an in depth analysis of teachers and school leaders perceptions of the value of their profession their work related well being and stress and their satisfaction with their working conditions it also offers a description of teachers and school leaders contractual arrangements opportunities to engage in professional tasks such as collaborative teamwork autonomous decision making and leadership practices

The Idea of the Brain

1870

this book provides a comprehensive and thorough guide to those readers who are lost in the often confusing context of weld fatigue it presents straightforward information on the fracture mechanics and material background of weld fatigue

starting with fatigue crack initiation and short cracks before moving on to long cracks crack closure crack growth and threshold residual stress stress concentration the stress intensity factor j integral multiple cracks weld geometries and defects microstructural parameters including haz and cyclic stress strain behavior the book treats all of these essential and mutually interacting parameters using a unique form of analysis

A Critical Dictionary of English Literature and British and American Authors, Living and Deceased

2018-12-03

the 2018 edition of international migration outlook analyses recent developments in migration movements and policies in oecd countries and some non member countries and looks at the evolution of the labour market outcomes of immigrants in oecd countries with a focus on the migrants job

Neural Information Processing

1870

in this book part i presents first an overview of the echord project with its mission and vision together with a detailed structure of its functionalities and instruments experiments robotic innovation facilities and public end user driven technology innovation pdti chapter 1 explains how the project is born the partners the different instruments and the new concept of cascade funding projects this novelty made echord a special project along the huge number of research groups and consortia

involved in the whole project so far it is the european funded project with more research team and partners involved in the robotic field in chapter 2 one of the instruments in echord is explained in detail rif robotic innovation facilities are a set of laboratories across europe funded with the project with the goal of hosting consortia involved in any experiment that have special needs when testing their robotic research in the chapter the three different and specific rifs will be described and analyzed chapter 3 explains an important instrument in echord the experiments in this part a big number of research groups have been involve in short time funded research projects the chapter explains the management of such experiments from the call for participation the candidate s selection the monitoring reviews and funding for each of the 36 experiments funded for echord chapter 4 is very special because it presents the innovation of funding public end user driven technology in particular robotic technology the robotic challenge is the key of such an instruments together with the management of the different consortia that participated competitively in the success of the robotic challenge proposed by a public entity selected also with a very special and innovative process

2019-05-16

this book constitutes the refereed proceedings of the 15th international conference entitled beyond databases architectures and structures bdas 2019 held in ustro  poland in may 2019 it consists of 26 carefully reviewed papers selected from 69 submissions the papers are organized in topical sections namely big data and

cloud computing architectures structures and algorithms for efficient data processing and analysis artificial intelligence data mining and knowledge discovery image analysis and multimedia mining bioinformatics and biomedical data analysis industrial applications networks and security

Bribery and Corruption in Weak Institutional Environments

2019-02-12

transfer pricing continues to be one of the most significant areas of heightened controversy in international taxation for multinational enterprises and tax administrations due to its far reaching consequences tax professionals and individual tax jurisdictions are required to understand the fundamentals of the topic which is often caught in a maze of literature emerging from the joint research conducted by the wu transfer pricing center at the institute for austrian and international tax law at wu vienna university of economics and business the international tax law firm l p ludovici piccone partners and the experiences from the annual advanced transfer pricing courses and conferences this first edition of the book acts as a manual for understanding transfer pricing principles and their practical application it provides a balanced approach by first detailing the basics of transfer pricing and second proceeding to specific topics that are highly relevant in today s tax environment for the purpose of easy understanding the book is presented in two parts part i general topics i introduction to transfer pricing ii accurate delineation and recognition of actual transactions comparability analysis iii transfer pricing methods part i traditional transaction methods iv transfer pricing

methods part ii transactional profit methods v administrative approaches to avoiding minimizing transfer pricing disputes vi administrative approaches to resolving transfer pricing disputes vii transfer pricing documentation master file country file and country by country reporting part ii specific topics viii attribution of profits to permanent establishments ix transfer pricing and intra group services x transfer pricing and intra group financial transactions xi transfer pricing and intangibles xii transfer pricing supply chain management and business restructurings xiii transfer pricing and customs valuation xiv transfer pricing and eu state aid in analysing the above topics the work undertaken by the oecd un eu world customs organization world bank international monetary fund and other international organizations is considered moreover the book contains several practical examples judicial precedents and illustrative explanations to complement the understanding the book will be a catalyst for immense learning of students and young professionals who are at the introductory stage of understanding the nuances of transfer pricing further the book also caters to tax lawyers in house tax counsels and academics working in international organizations the business community and advisory firms as well as government officials interested in understanding transfer pricing

Advances in Embedded and Fan-Out Wafer Level Packaging Technologies

1874

this book provides a comprehensive overview of the biosimilar regulatory framework the development process and clinical aspects for development of

biosimilars the development path of a biosimilar is just as unique as a development path of a new drug tailored by the mechanism of action the quality of the molecule published information on the reference product the current competitive environment the target market and regulatory guidance and most importantly the emerging totality of evidence for the proposed biosimilar during development for the ease of readers the book comprises of six sections as follows section i business health economics and intellectual property landscape for biosimilars section ii regulatory aspects of development and approval for biosimilars section iii biopharmaceutical development and manufacturing of biosimilars section iv analytical similarity considerations for biosimilars section v clinical aspects of biosimilar development section vi biosimilars global development and clinical experience chapters have been written by one or more experts from academia industry or regulatory agencies who have been involved with one or more aspects of biosimilar product development the authors and editors have an expertise in commercialization and pricing of biosimilars intellectual property considerations for biosimilars chemistry manufacturing controls cmc and analytical development for biosimilars regulatory and clinical aspects of biosimilar development besides the industry practitioners the book includes several contributions from regulators across the globe

A Critical Dictionary of English Literature and British and American Authors

2020-03-23

this volume explores the two themes of equity in employment for muslim women

and the identity and aspirations of muslim youth in an age of islamophobia in western countries through conceptual and empirical studies of employment discrimination and alienation in the uk and the netherlands to these accounts are added a worldwide perspective on how women and especially ethnic minority and muslim women experience and try to overcome ethno religious discrimination in entry to employment the themes of muslim women and youth struggling to survive are illustrated by accounts of teachers from gaza who are providing alternative families for children traumatised and orphaned through israeli attacks the idea of peaceful resistance and islamic patience in the face of persecution is developed throughout the book and applied in a variety of settings

TALIS 2018 Results (Volume II) Teachers and School Leaders as Valued Professionals

2018-12-11

this book focuses on the fundamentals and recent advances in rgb d imaging as well as covering a range of rgb d applications the topics covered include data acquisition data quality assessment filling holes 3d reconstruction slam multiple depth camera systems segmentation object detection saliency detection pose estimation geometric modelling fall detection autonomous driving motor rehabilitation therapy people counting and cognitive service robots the availability of cheap rgb d sensors has led to an explosion over the last five years in the capture and application of colour plus depth data the addition of depth data to regular rgb images vastly increases the range of applications and has resulted in a demand for robust and real time processing of rgb d data there remain many

technical challenges and rgb d image processing is an ongoing research area this book covers the full state of the art and consists of a series of chapters by internationally renowned experts in the field each chapter is written so as to provide a detailed overview of that topic rgb d image analysis and processing will enable both students and professional developers alike to quickly get up to speed with contemporary techniques and apply rgb d imaging in their own projects

Fatigue and Fracture of Weldments

2018-06-20

teachers use e learning systems to develop course notes and web based activities to communicate with learners on one side and monitor and classify their progress on the other learners use it for learning communication and collaboration adaptive e learning systems often employ learner models and the behavior of an adaptive system varies depending on the data from the learner model and the learner s profile without knowing anything about the learner who uses the system a system would behave in exactly the same way for all learners bayesian networks for managing learner models in adaptive hypermedia systems emerging research and opportunities is a collection of research on the use of bayesian networks and methods as a probabilistic formalism for the management of the learner model in adaptive hypermedia it specifically discusses comparative studies transformation rules and case diagrams that support all phases of the learner model and the use of bayesian networks and multi entity bayesian networks to manage dynamic aspects of this model while highlighting topics such as developing the learner model learning management systems and modeling techniques this book is ideally designed for instructional designers course administrators educators researchers

and professionals

International Migration Outlook 2018

2019-09-17

handbook of psychosocial interventions for chronic pain provides a cutting edge and comprehensive review of interventions for chronic pain grounded in biopsychosocial frameworks each chapter gives readers the opportunity to solidify their knowledge of major approaches to chronic pain in an accessible format reflecting national efforts to reduce prescriptions for pain medications and increase access to interdisciplinary treatment approaches the book also considers a wide range of person level variables such as age cultural factors and comorbid mental health conditions in this book mental health and allied health professionals will find the tools they need to understand the real world delivery of chronic pain treatments in a wide variety of settings

Advances in Robotics Research: From Lab to Market

2019-05-07

this book examines the emerging problems and opportunities that are posed by media innovations spatial typologies and cultural trends in re shaping identities within the fast changing milieus of the early 21st century addressing a range of social and spatial scales and using a phenomenological frame of reference the book draws on the works of heidegger merleau ponty and don hide to bridge the seemingly disparate yet related theoretical perspectives across a number of disciplines various perspectives are put forward from media human geography

cultural studies technologies urban design and architecture etc and looked at thematically from networked culture and digital interface and other perspectives the book probes the ways in which new digital media trends affect how and what we communicate and how they drive and reshape our everyday practices this mediatization of space with fast evolving communication platforms and applications of digital representations offers challenges to our notions of space identity and culture and the book explores the diverse yet connected levels of technology and people interaction

Beyond Databases, Architectures and Structures.

Paving the Road to Smart Data Processing and Analysis

2019-01-03

this new edition provides a comprehensive overview of current theory and research written by the top theorists and researchers in each area it has been updated to address the growing influence of technology changing relationships and several growing integrated approaches to communication and includes seven new chapters on digital media media effects privacy dark side applied communication relational communication instructional communication communication and the law the book continues to be essential reading for students and faculty who want a thorough overview of contemporary communication theory and research

Fundamentals of Transfer Pricing

2008

epidemiology of chronic disease global perspectives is the most current and authoritative resource on the epidemiology etiology pathogenesis risk factors and preventive factors of over 50 major chronic diseases and conditions this comprehensive text provides readers with an excellent basis for examining current hypotheses regarding chronic disease epidemiology

Bond Guide

2018-12-13

this collection of 25 research papers comprised of 22 original articles and 3 reviews is brought together from international leaders in bioinformatics and biostatistics the collection highlights recent computational advances that improve the ability to analyze highly complex data sets to identify factors critical to cancer biology novel deep learning algorithms represent an emerging and highly valuable approach for collecting characterizing and predicting clinical outcomes data the collection highlights several of these approaches that are likely to become the foundation of research and clinical practice in the future in fact many of these technologies reveal new insights about basic cancer mechanisms by integrating data sets and structures that were previously immiscible accordingly the series presented here bring forward a wide range of artificial intelligence approaches and statistical methods that can be applied to imaging and genomics data sets to identify previously unrecognized features that are critical for cancer our hope is

that these articles will serve as a foundation for future research as the field of cancer biology transitions to integrating electronic health record imaging genomics and other complex datasets in order to develop new strategies that improve the overall health of individual patients

Biosimilars

2019-06-20

this volume presents the results of bulgarian and international tourism research and brings together selected papers from the international conference tourism and innovations held in varna bulgaria in 2018 it contains theoretical and empirical approaches towards various aspects of tourism concerning both innovations in tourism development and in foreign languages education as a whole the book presents innovative solutions and processes in tourism including management and staff training provoked by today s opportunities and challenges for future tourism development the first part is dedicated to issues in tourism innovation ranging from those provoked from the changing global environment and tourism demand through to social innovations concerning tourism products and human resources management the second section of the book deals with traditions and innovations in foreign language education oriented to managers operational staff and decision makers in tourism
