creative morality is a philosophical study of moral dilemmas western moral thought has relied on two basic ethical perspectives utilitarianism and kantianism to resolve dilemmas macniven argues that no real progress can be made with modern moral problems unless these traditions are coherently synthesised the book deals with diverse topics such as academic honesty medical confidentiality terrorism and euthanasia and the hypothetical dilemmas used are based on real life situations so that theory might be tested against reality yet the solutions are not definitive because as macniven demonstrates creativity is an intrinsic characteristic of moral thought let's face it planning and saving for retirement is not easy we are told that the earlier we start the better and that the magic of compounding will make our dreams come true if we simply trust the stock market and our investment advisor but for most people it's simply not possible people in their twenties are often saddled with student debt and may be struggling to find suitable full time employment saving for retirement is the last thing on their minds as it should be then in our thirties and forties we tend to do things like get married have kids and buy houses all these things cost a lot of money so for many people there simply isn't any money left to put away for retirement therefore many of us become procrastinators when it comes to saving for retirement but there is hope this book will take you step by step though planning and saving for retirement starting in your fifties and the best way to energetic young man of 17 had just moved out of his parent's home in northern british columbia moving into a railway camp as an employee with the british columbia railway all goes well as jens enjoys his new found freedom treasuring his driver's license and its associated freedom of travel then on a wintry day in 1981 fate rears its ugly head and strikes him blind in his left eye jens quickly rearranges his life to accommodate his new found fear that of losing his remaining eye now that the true vulnerability of his eyesight is revealed as his life continues onwards despite the initial readjustment he finds ultimate happiness in his new marriage to his young wife lorri and just when life stands at its threshold of paradise exploring fatherhood along with the beauty of travel and thrill his worst nightmare becomes reality not once but twice in the most bizarre series of unforeseen incidents of bad luck as jens is totally blinded with no foreseeable chance of seeing again according to the best medical experts jens tries his best to adjust to this unwanted situation exploring conventional methods of rehabilitation to live with blindness as well as using imaginative totally unheard of activities in order to pass his time in a hope of someday being able to see again despite all the odds stacked against him close to the turn of the century jens unexpectedly receives news of an american medical device engineer dr william h dobelle inviting blind adults as patients for his newly developed artificial vision system designed to provide limited vision via visual cortex stimulation dr dobelle claims that his system has a good chance in functioning based on previous experimenting with volunteers at the same time classifying the surgical procedure as minor the system and its related components is complicated consisting of not only the implants but a series of electrical sockets protruding from the patient's head to which an array of computer boxes and stimulator hardware is connected and worn by the patient jens is determined to be one of the patients regardless of the remoteness of the chance of being one out of literally millions of blind people in the world possibly lining up to have this procedure in hopes of ending their blindness for once and for all to his absolute surprise jens is accepted as the first patient for this procedure and slowly builds a relationship with dr dobelle as jens overcomes obvious barriers of raising enough money for the very expensive procedure as well as fighting the challenges of relentless forces working against him for his involvement in the dobelle vision project armed with preconceived ideas of how a research institute should be run jens travels overseas for the various stages of the procedure only to find the most astonishing facts of what goes on in the heart of a renowned medical research institute not only is jens looking at the workings

of the dobelle institute from the view of a patient but in short time jens is hired by the firm as patient representative providing further exploration yet on the inner most details concerning a research company and its treatment of the 15 additional implanted patients throughout the book jens describes the devastation exhilaration disappointment elation and confusion that attempts at sight recovery medical intervention media propaganda and ethical boundaries conjure in the most illustrative intensity the manner in which the book ends is most indescribable one could view it as the final straw the beginning of a new era the curse of the unforgiven the sadness of a crushing reality the beginning of a good job left unfinished or that of the birth of a new expert compelled to unleash the new found knowledge for the whole world to thrive just as many questions are answered many more yet are opened and left so far undiscovered search for paradise is ce for most people gender identity is pretty straightforward we are identified as a boy or a girl at birth and don t give it a second thought for others however the gender they were born into is not the gender they feel is their true
