why are america s public schools falling so short of the mark in educating the nation s children why are they organized in ineffective ways that fly in the face of common sense to the point that it is virtually impossible to get even the worst teachers out of the classroom and why after more than a quarter century of costly education reform

have the schools proven so resistant to change and so difficult to improve in this path breaking book Terry Moe demonstrates that the answers to these questions have a great deal to do with teachers unions which are by far the most powerful forces in American education and use their power to promote their own special interests at the expense of what is best for kids despite their importance the teachers unions have barely been studied special interest fills that gap with an extraordinary analysis that is at once brilliant and kaleidoscopic shedding new light on their historical rise to power the organizational foundations of that power the ways it is exercised in collective bargaining and politics and its vast consequences for American education the bottom line is simple but devastating as long as the teachers unions remain powerful the nation's schools will never be organized to provide kids with the most effective education possible Moe sees light at the end of the tunnel however due to two major transformations one is political the other technological and the combination is destined to weaken the unions considerably in the coming years loosening their special interest grip and opening up a new era in which America's schools can finally be organized in the best interests of children

growing travel freight movements congestion and international competition threaten the economic well being of the upper midwest states more congestion slower freight movement fragmentation and economic slow down are the probable outcomes if the threats are not addressed however planning for and managing the growth of freight transport are complex issues facing transportation agencies in the region in an effort to crystallize the issues and generate thought and discussion eleven white papers were written on important factors that influence freight and public policy the papers provide the background on specific aspects of freight in the upper midwest as a collection the papers provide a primer on freight issues and related responses that may form the basis for a regional freight agenda the upper midwest freight corridor coalition used input from transportation administrators in Ohio Indiana Michigan Wisconsin Illinois Minnesota and Iowa as well as the provinces of Ontario and Manitoba along with the federal highway administration and researchers from the University of Wisconsin Madison the University of Illinois Chicago and the University of Toledo to draft an agenda to help meet the challenge of freight movement and economic

vitality within the upper midwest the agenda identifies thirteen priority initiatives to respond to growing freight demand data and technology are needed to support the initiatives outlined in the agenda and both topics are discussed in subsequent plans the final report in volume ii is a white paper explaining the importance of transportation to the economic well being of the region
