volume focuses on the status of the elderly and the disabled after disasters globally as well as the challenges of post earthquake rebuilding in haiti the international federation of the red cross and red crescent societies has estimated that between 1987 and 2007 about 26 million older people were affected each year by natural disasters alone and that this figure could more than double by 2050 due to the rapidly changing demographics of ageing people with disabilities physical medical sensory or cognitive are equally at risk of utter neglect during and after disasters the australian agency for international development estimates that 650 million people across the world have a disability and about 80 per cent of them live in developing countries similarly before the january 2010 earthquake haiti was a country with tremendous development needs and numerous impediments to development according to congresswoman maxine waters when introducing a resolution in the us house of representatives to cancel haiti s debts in march 2007 these impediments included an overwhelming burden of international debt lack of personal and community assets and very little or no internal and external capacities all of which have been exacerbated by the aftermath of the earthquake it was against this background that the center for rebuilding sustainable communities after disasters at the university of massachusetts boston organized two international conferences in 2010 in april on rebuilding sustainable communities in haiti in the wake of the january earthquake and in july on rebuilding sustainable communities with the elderly and disabled people after disasters this edited book consists of selected papers that were presented at these academic events the topics include disaster experiences of the elderly and the disabled in nigeria the vulnerability of elderly people in the aftermath of earthquakes in iran methods for assessing and developing understanding of resiliency in communities the tuareg s traditional shelter for disaster mitigation and reconstruction in libya and people with disabilities in haiti before and after the 2010 earthquake 49 cfr transportation presenting time tested standard as well as reliable emerging knowledge on threaded fasteners and joints this book covers how to select parts and materials predict behavior control assembly processes and solve on the job problems it examines key issues affecting bolting in the automotive pressure vessel petrochemical aerospace and structural steel industries the editors have successfully created a useful rather than scholarly handbook with chapters written in a straightforward how to do it manner theory is discussed only when necessary and the handbook's logical organization and thorough index enhances its usefulness although not the first v 8 engine ever produced henry ford s side valve v 8 launched in 1932 certainly qualified as the first mass produced v 8 sold to the public because of henry ford s stubbornness the first versions were less than ideal the technology was in its infancy and cost cutting measures limited the output and reliability of the early models over time however the flattie became the go to powerplant for a whole generation of new hobbyists who were called hot rodders the engine maintained its position in the hobby well into the 1950s even when more modern overhead valve designs started coming out of detroit it s hard to overstate the impact that this simple little engine had on a whole generation of enthusiasts even today people choose a flathead for
