Principle and Practice in Applied Linguistics 1995-07-20 this volume provides a wide ranging overview of the diverse issues in applied linguistics today the contributors consider the relation of their own areas of enquiry both to professional practice and to the discipline as a whole

Connecting Policy and Practice 2005 this volume delivers a selection of papers presented at an international teaching conference on issues of theory and practice these key topics will be of interest to novice and veteran teachers policy makers and all education professionals

Bridging Theory and Practice in Teacher Education 2007-01-01 this book addresses both the concerns of teacher candidates and their misconceptions about the relation of theory and practice in education the contributors to this volume share the belief that theories provide teachers with a frame of reference and a language with which to name and critically analyze many of the problems they face daily

Practice, Learning and Change 2012-06-25 the three concepts central to this volume practice learning and change have received very different treatments in the educational literature an oversight directly confronted here while learning and change have been extensively theorised their various contexts articulated and analysed practice is notably underrepresented where much of the literature on learning and change takes the notion of practice as an unexamined given its co location as a term with various classifiers as in legal practice and teaching practice render it curiously devoid of semantic force in this book practice is the super ordinate organising idea drawing on what has been termed the practice turn in contemporary theory the work develops a conceptual framework for researching learning in and on practice it challenges received notions of practice questioning the assumptions elisions connotations and silences on the subject in so doing it offers fresh insights into learning and change and how they relate to practice in tandem with this conceptual work the book details site ontological studies of practice and learning in diverse professional and workplace contexts examining the work of occupations as various as doctors chefs and orchestral musicians it demonstrates the value of theorising practice learning and change as well as exploring the connections between them amid our evolving social and institutional structures

Inclusive Education and the Issue of Change 2015-06-22 exploring the theoretical policy and classroom pedagogical dimensions of transformative change within the context of inclusive education policy and practice this book documents how ideological presuppositions and professional practice should be transformed in order to meet learner diversity in effective and non discriminatory ways

The Idea and Practice of Reading 2018-05-08 this book addresses basic issues in language education and explores how reading with a focus on

meaning contributes to the development of all aspects of language including vocabulary spelling grammar and syntax it departs from traditional methods and practices in language learning to investigate the potency of reading in improving language acquisition the traditional practice in language classes to teach language skills explicitly through acquiring forms and structures of language is often less than successful and teachers are gradually incorporating reading materials and practices into the curriculum this book provides important inputs to language teachers and educators on the need to include reading as an idea and as a practice into the curriculum among other things it explores the benefits of incidental learning of language properties such as vocabulary syntax and grammar and gives adequate exposure to different types of reading strategies to promote reading among learners it also exploits the possible transfer of l1 reading strategies and capabilities to l2 reading for language acquisition in so doing this book hopes to promote autonomous learning among l2 learners and guide readers in alternative strategies to solve comprehension problems

Learning and Practice 2008-07-18 by examining ideas about learning that transcend typical boundaries such as school workplace or home school this book emphasises the socially negotiated and embedded nature of meaning making and how learners learn to use the cognitive tools of their cultural community through participation in social activity the editors argue that this is the means by which individual agency is extended and learners identities as forms of competency are transformed the book locates sociocultural understanding in a wide theoretical frame and demonstrates its implications for learning and assessment generally covering a range of educational and workplace settings the contributions challenge ways of understanding learning and thinking about practice both teaching and assessment drawing on the international literature this book is essential reading for students of curriculum learning and assesment in all sectors from pre primary to further and higher education it is suitable as a core text for masters and taught doctorate programmes it will be of interest to a range of professionals involved with curriculum learning and the practice of teaching and assesment it is also relevant to those in work based and professional education and training and informal educational settings a unique collection in a field that is underrepresented it will also be of interest to an acadmeic audience

Learning Through Practice 2010-06-02 practice based learning the kind of education that comes from experiencing real work in real situations has always been a prerequisite to qualification in professions such as medicine however there is growing interest in how practice based models of learning can assist the initial preparation for and further development of skills for a wider range of occupations rather than being

seen as a tool of first time training it is now viewed as a potentially important facet of professional development and life long learning this book provides perspectives on practice based learning from a range of disciplines and fields of work the collection here draws on a wide spectrum of perspectives to illustrate as well as to critically appraise approaches to practice based learning the book s two sections first explore the conceptual foundations of learning through practice and then provide detailed examples of its implementation long standing practice based approaches to learning have been used in many professions and trades indeed admission to the trades and major professions e g medicine law accountancy can only be realised after completing extended periods of practice in authentic practice settings however the growing contemporary interest in using practice based learning in more extensive contexts has arisen from concerns about the direct employability of graduates and the increasing focus on occupation specific courses in both vocations and higher education it is an especially urgent issue in an era of critical skill shortages rapidly transforming work requirements and an aging workforce combined with a looming shortage of new workforce entrants we must better understand how existing models of practice based learning are enacted in order to identify how they can be applied to different kinds of employment and workplaces the contributions to this volume explore ways in which learning through practice can be conceptualised enacted and appraised through an analysis of the traditions purposes and processes that support this learning including curriculum models and pedagogic practices

Integrative Learning 2014-11-13 current teaching learning and assessment practices can lead students to believe that courses within a programme are self sufficient and separate integrative learning explores this issue and considers how intentional learning helps students become integrative thinkers who can see connections in seemingly disparate information and draw on a wide range of knowledge to make decisions written by international contributors who engaged reflectively with their teaching and their students learning the book seeks to develop a shared language of integrative learning encouraging students to adapt skills learned in one situation to problems encountered in another and make autonomous connections across courses between experiences and throughout their lives more informed teachers can help students develop the necessary attributes for intentional learning which include having a sense of purpose fitting fragmentary information into a learning framework understanding something of their own learning processes asking probing questions reflecting on their own choices and knowing when to ask for help integrative learning draws on international research and vast studies to provide the reader with the resources to ensure access to a unified learning experience the book discusses conceptual and

technical tools necessary for facilitating integrative learning across a range of disciplines as well as providing learning pedagogies and considers integrative learning in the context of the relevance of higher education in the complexity and uncertainty of the 21st century it will appeal to academics and researchers in the field of higher education as well as those generating higher education curriculums
