the need for a new method for assessment and imaging of families couples and individuals has emerged in response to changes in family forms during the twentieth century in the twentieth century divorce remarriage out of wedlock child bearing and alternate life styles have replaced monogamy as predominant form of marriage and the family the methods of representation and assessment on the other hand remain based on the nineteenth century eugenics models embedded in the modern day genograms this book is based on the premise that changes in family structure require changes in methods of representation assessment research and teaching this book introduces such a method in the form of a model named the affinograph the affinograph provides a method which allows a greater respect for individuals especially if their relationships contradict the preconceived institutional notions of marriage and the family improvement in visualizing families of various types and complexities can make affinographs an important new method that can bring together the theory research and application across varied disciplines that comprise family sciences

henry allison examines the central tenets of hume's epistemology and cognitive psychology as contained in the treatise of human nature allison takes a distinctive two level approach on the one hand he considers hume's thought in its own terms and historical context so considered hume is viewed as a naturalist whose project in the first three parts of the first book of the treatise is to provide an account of the operation of the understanding in which reason is subordinated to custom and other non rational propensities scepticism arises in the fourth part as a form of metascepticism directed not against first order beliefs but against philosophical attempts to ground these beliefs in the space of reasons on the other hand allison provides a critique of these tenets from a kantian perspective this involves a comparison of the two thinkers on a range of issues including space and time causation existence induction and the self in each case the issue is seen to turn on a contrast between their underlying models of cognition hume is committed to a version of the perceptual model according to which the paradigm of knowledge is a seeing with the mind's eye of the relation between mental contents by contrast kant appeals to a discursive model in which the fundamental cognitive act is judgment understood as the application of concepts to sensory data whereas regarded from the first point of view hume's account is deemed a major philosophical achievement seen from the second it suffers from a failure to develop an adequate account of concepts and judgment

for more than a century nietzsche s views about jews and judaism have been subject to countless polemics the nazis infamously fashioned the philosopher as their anti semitic

precursor while in the past thirty years the pendulum has swung in the opposite direction the increasingly popular view today is that nietzsche was not only completely free of racist tendencies but also was a principled adversary of anti jewish thought nietzsche s jewish problem offers a definitive reappraisal of the controversy taking the full historical intellectual and biographical context into account as robert holub shows a careful consideration of all the evidence from nietzsche s published and unpublished writings and letters reveals that he harbored anti jewish prejudices throughout his life nietzsche s jewish problem demonstrates how this is so despite the apparent paradox of the philosopher s well documented opposition to the crude political anti semitism of the germany of his day as holub explains nietzsche s anti anti semitism was motivated more by distaste for vulgar nationalism than by any objection to anti jewish prejudice a richly detailed account of a controversy that goes to the heart of nietzsche s reputation and reception nietzsche s jewish problem will fascinate anyone interested in philosophy intellectual history or the history of anti semitism

max weber wrote these methodological essays in the closest intimacy with actual research and against a background of constant and intensive meditation on substantive problems in the theory and strategy of the social sciences they were written between 1903 and 1917 the most productive of max weber s life when he was working on his studies in the sociology of religion and wirtschaft und gesellschaft weber had done important work in economic and legal history and had taught economic theory on the basis of original investigations he had acquired a specialist s knowledge of the details of german economic and social structure his always vital concern for the political prosperity of germany among the nations thrust him deeply into discussion of political ideals and programs weber s methodology still holds interest for us some of its shortcomings from the contemporary viewpoint may be attributed to the fact that some of the methodological problems that he treated could not be satisfactorily resolved prior to certain actual developments in research technique these few qualifications aside the work remains a pioneering work in large scale social research from one of the field s masters

a dangerous passion argues that leadership and honor are mutually constitutive and that this dynamic relationship fundamentally shapes the character of political practice haig patapan shows how our contemporary blindness to this leadership honor dynamic and neglect of the significance of honor and shame in modern politics have caused us to fundamentally misunderstand the nature of leadership we have lost sight of how honor shapes the ambitions and aspirations of those who seek political office and the opportunities and limits it imposes on leaders when engaging with their followers what has been obscured are the two faces of honor how it is the dangerous passion that fuels the ambitions of the glory seekers to pursue tyranny and empire as well as being the source of good leadership that is founded on noble ambition and sacrifice for the common good patapan examines classical magnanimity machiavellian glory and hobbesian dispersed leadership views that continue to be debated and then offers insights from these debates to illuminate a series of contemporary political challenges for leaders including the politics of fame identity and nationalism
