last thirty years further enhanced the promotion of english and the creation of soft power for britain in the early 1990s the focus of the british council changed from test development to delivery of british examinations through its global network however by the early years of the 21st century the organisation was actively considering a return to test development a strategy that was realised with the founding of the assessment research group in early 2012 this was followed later that year by the introduction of the aptis english language testing service the first major test developed in house for over thirty years as well as setting the stage for the re emergence of professional expertise in language testing within the organisation these initiatives have resulted in a growing strategic influence for the organisation on assessment in english language education this influence derives from a commitment to test localisation the development and provision of flexible accessible and affordable tests and an efficient delivery marking and reporting system underpinned by an innovative socio cognitive approach to language testing this final period can be seen as a clear return by the british council to using language testing as a tool for enhancing soft power for britain a return to the original raison d etre of the organisation
