today when many parents seem reluctant to have their children vaccinated even with long proven medications the salk vaccine trial which enrolled millions of healthy children to test an unproven medical intervention seems nothing short of astonishing in selling science medical historian stephen e mawdsley recounts the untold story of the first large clinical trial to control polio using healthy children 55 000 healthy children revealing how this long forgotten incident cleared the path for salk s later trial mawdsley describes how in the early 1950s dr william hammon and the national foundation for infantile paralysis launched a pioneering medical experiment on a previously untried scale conducted on over 55 000 healthy children in texas utah iowa and nebraska this landmark study assessed the safety and effectiveness of a blood component gamma globulin to prevent paralytic polio the value of the proposed experiment was questioned by many prominent health professionals as it harbored potential health risks but as mawdsley points out compromise and coercion moved it forward and though the trial returned dubious results it was presented to the public as a triumph and used to justify a federally sanctioned mass immunization study on thousands of families between 1953 and 1954 indeed the concept conduct and outcome of the gg study were sold to health professionals medical researchers and the public at each stage at a time when most americans trusted scientists their mutual encounter under the auspices of conquering disease was shaped by politics marketing and at times deception drawing on oral history interviews medical journals newspapers meeting minutes and private institutional records selling science sheds light on the ethics of scientific conduct and on the power of marketing to shape public opinion about medical experimentation

this book explores medical and health periodicals of the nineteenth century their contemporary significance their

readership and how historians have approached them as objects of study from debates about women doctors in lesser known titles such as the medical mirror to the formation of professional medical communities within french and portuguese periodicals the contributors to this volume highlight the multi faceted nature of these publications as well as their uses to the historian medical periodicals far from being the preserve of doctors and nurses were also read by the general public thus the contributions collected here will be of interest not only to the historian of medicine but also to those interested in nineteenth century periodical culture more broadly the chapters in this book were originally published as a special issue of the journal media history

from social psychologist dr devon price a fascinating and thorough examination of what they call the laziness lie which falsely tells us we are not working or learning hard enough filled with practical and accessible advice for overcoming society s pressure to do more extra curricular activities honors classes 60 hour work weeks side hustles like many americans dr devon price believed that productivity was the best way to measure self worth price was an overachiever from the start graduating from both college and graduate school early but that success came at a cost after price was diagnosed with a severe case of anemia and heart complications from overexertion they were forced to examine the darker side of all this productivity laziness does not exist explores the psychological underpinnings of the laziness lie including its origins from the puritans and how it has continued to proliferate as digital work tools have blurred the boundaries between work and life using in depth research price explains that people today do far more work than nearly any other humans in history yet most of us often still feel we are not doing enough dr price offers science based reassurances that productivity does not determine a person s worth and suggests that the solution to problems of overwork and stress lie in resisting the pressure to do more and instead learn to embrace doing enough featuring interviews with researchers consultants and experiences from real people drowning in too much work laziness does not exist encourages us to let go of guilt and become more attuned to our own limitations and needs and resist the pressure to meet outdated societal expectations

sophia jex blake led the campaign that won for british women the right to enter the medical profession before taking up this cause she had studied women s education in england germany and the united states and rejected the popular contemporary view that higher education would be wasted on women her medical crusade in britain resulted in women s rights to professional careers and financial independence being more widely accepted after years of extensive lobbying she founded the london school of medicine for women in 1874 and two years later largely due to her efforts legislation was passed enabling women to take qualifying examinations in medicine shirley roberts shows sophia jex blake to have been a determined and resourceful pioneer skilful in winning over both public and political opinion but she was also an impetuous and at times tactless woman who could provoke hostility as well as loyalty sophia jex blake is a fascinating account of one woman s struggle for equality

Official Gazette of the United States Patent Office 1945

it is a myth that either of the world wars liberated women the sex disqualification removal act of 1919 was one of the most significant pieces of legislation in modern britain it marked at once political watershed and a social revolution the point at which women of 21 and over were recognised in law as being as competent as men but were they what actually happened when this bill was passed this is the story of what happened next ladies can t climb ladders focuses on the lives of six women six pioneers forging paths in the fields of medicine law academia architecture engineering and the church robinson s startling study into the public and private lives of these women sheds light not on the desires and ambitions of her subjects but how family and society responded to the working woman and what their legacy looks like today this book is written in their honour it is a book about live subjects equal opportunity the gender pay gap and whether women can expect or indeed deserve to have it at all an important and crackingly good read telegraph
