## **A Complete Guide to Rubrics**

2011-11-10

ever since socrates teaching has been a difficult and even dangerous profession why is good teaching such hard work in this provocative witty and sometimes rueful book david k cohen writes about the predicaments that teachers face like therapists social workers and pastors teachers embark on a mission of human improvement they aim to deepen knowledge broaden understanding sharpen skills and change behavior one predicament is that no matter how great their expertise teachers depend on the cooperation and intelligence of their students yet there is much that students do not know to teach responsibly teachers must cultivate a kind of mental double vision distancing themselves from their own knowledge to understand students thinking yet using their knowledge to guide their teaching another predicament is that although attention to students thinking improves the chances of learning it also increases the uncertainty and complexity of the job the circumstances in which teachers and students work make a difference teachers and students are better able to manage these predicaments if they have resources common curricula intelligent assessments and teacher education tied to both that support responsible teaching yet for most of u s history those resources have been in short supply and many current accountability policies are little help with a keen eye for the moment to moment challenges cohen explores what responsible teaching can be the kind of mind reading it seems to demand and the complex social resources it requires

## Teaching and Its Predicaments

2011-08-31

analysis of past developments in teacher education in pakistan has shown that substantial progress has been made in this field it has however been pointed out that education of science teachers still needs much improvement at the present there is an emergent need to meet the shortage of qualified science teachers and at the same time to bring qualitative improvements in the courses offered in teacher education institutions first we recommend that the 1 year duration of teacher preparation is grossly inadequate for all teaching courses and should be lengthened and the qualifications for entrance be increased we believe that teaching must be made a graduate profession for example the basic qualification of primary school teachers for admission to teacher education institution should be increased we recommend that ptc should be made a 12 2 year program similarly ct 12 3 b ed 14 2 b s ed 12 4 m a ed 14 3 and m ed one year after b ed or b s ed secondly we think the quality of instruction in teacher preparation programs should be improved most teachers in the teacher preparation institutions use the lecture method most of the time prospective teachers behave like passive listeners to their teachers they do not participate in the teaching learning process some instructors even dictate their notes to the preservice teachers when the teachers join schools they behave the same way

## **PowerPoint for Teachers**

## **Common-Sense Classroom Management for Special Education Teachers, Grades K-5**

2006-03-13

this book considers teaching in modern institutional settings among other things as the ethical questioning and reversal of passively accepted prejudices particularly in contexts of diversities and inequalities its thematic focus is the ethics of teacher learner and learner learner relationships within the democratic setup and the possibilities of critique and transformation emerging out of such a relationship the first theme of the book is diversity and pluralism the second is the question of inequality in such contexts of radical diversity with respect to this question an unavoidable phenomenon of our times is the capitalisation of education and the reductionist view of learners as customers and consumers of knowledge the approach to education that sees students merely as skilled human resources to be readied for the job market militates against critical thinking and do not respond appropriately to the questions of diversity and inequality thus a significant focus of the book is the impact of inherited inequalities of caste and race on classroom ambience and teachers interventions in the modern institutional context the pertinent question is the increasing unwillingness of teachers to recognise and challenge discriminatory views and play their role in social transformation in this regard the teaching and learning of the humanities is also investigated teaching and the traditional classroom it is often said may not be required in the future as machines and remotely located teachers explicators might claim their place hence another question of focus is whether such a future would be hospitable to the critical task of education to cultivate young citizens of democracies

## **Changing Expectations for the K-12 Teacher Workforce**
