most observers who follow nuclear history agree on one major aspect regarding israel s famous policy of nuclear ambiguity mainly that it is an exception more specifically it is largely accepted that the 1969 nixon meir understanding which formally established israel s policy of nuclear ambiguity and transformed it from an undeclared israeli strategy into a long lasting undisclosed bilateral agreement was in fact a singularity aimed at allowing washington to turn a blind eye to the existence of an israeli arsenal according to conventional wisdom this nuclear bargain was a foreign policy exception on behalf of washington an exception which reflected a relationship growing closer and warmer between the superpower leading the free world and its small cold

war associate contrary to the orthodox narrative this research demonstrates that this was not the case the 1969 bargain was not in fact an exception but rather the first of three cold war era deals on nuclear tests brokered by washington with its cold war associates the other two being pakistan and south africa these two deals are not well known and until now were discussed and explored in the literature in a very limited fashion bargaining on nuclear tests places the role of nuclear tests by american associates as well as washington s attempts to prevent and delay them at the heart of a new nuclear history narrative

this book provides a critical understanding of europeanization and statebuilding in the western balkans using the notion of everyday practices this volume argues that it is everyday and mundane events that provide the entry points to showcase a broader set of practices of europeanization in countries outside the eu it does this by tracing notions of europeanization in the everyday statebuilding of kosovo europe day celebrations in bosnia and herzegovina urban politics in tirana and space and place making in skopje in doing so the book shows that everyday events tell us that as much as it is about changing structures institutions and economic models europeanization is also about changing behaviours and ideas in populations at large at the same time the work shows that countries outside the eu use everyday events to perform their belonging to europe this book will be of much interest to students of european studies balkan politics statebuilding and international relations generally
