~~Causes of War 2013-01-15~~ what causes war how can  
military conflicts best be prevented in this book  
stephen van evera frames five conditions that increase  
the risk of interstate war false optimism about the  
likely outcome of a war a first strike advantage  
fluctuation in the relative power of states  
circumstances that allow nations to parlay one conquest  
into another and circumstances that make conquest easy  
according to van evera all but one of these conditions  
false optimism rarely occur today but policymakers  
often erroneously believe in their existence he argues  
that these misperceptions are responsible for many  
modern wars and explores both world wars the korean war  
and the 1967 mideast war as test cases finally he  
assesses the possibility of nuclear war by applying all  
five hypotheses to its potential onset van evera s book  
demonstrates that ideas from the realist paradigm can  
offer strong explanations for international conflict  
and valuable prescriptions for its control

An Introduction to the Causes of War 2021-04-07 this  
pioneering book explains the causes of war through a  
sustained combination of theoretical insights and  
detailed case studies from wwi to the iraq war cashman  
and robinson find that while all wars have multiple  
causes specific factors typically combine in  
identifiable dangerous patterns that lead to bloody  
conflicts between countries

The Great War 1917 first published in the aftermath of  
world war i g lowes dickinson s classic study of the  
causes of war remains as relevant today as it was  
nearly a century ago drawing on historical examples and  
contemporary analysis he identifies the complex social  
economic and political factors that lead to conflict  
and calls for a new international order based on  
cooperation and mutual respect this work has been

**Causes and Consequences of the First World War** 2003 the origins of the war of 1812 have long been a source of confusion for historians owing to the lack of attention that has been paid to england s part in precipitating the conflict and to the overemphasis placed on western expansionist factors this volume offers the first analysis of the causes of the war from both the british and american points of view showing clearly that contrary to the popular misconception the war s basic causes are to be found not in america but in europe for unless one accepts the view that america committed an act of pure aggression in 1812 one must turn to the motives underlying british policy to deter mine why america felt it had to fight in the years immediately preceding the war 1803 1812 england was dominated by a faction that pledged itself not only to defeat napoleon but also to maintain british commercial supremacy the two main points of contention between england and america during this period impress ment and the restrictions imposed by the orders in council were

~~direct results of these commitments america finally had~~  
no alternative but to oppose with force british  
maritime policy which although partly caused by  
jealousy of american commercial growth stemmed in large  
measure from involvement in total war with france in  
addition to tracing the gradual drift to war in america  
reginald horsman shows that the indian problem and  
american expansionist designs against canada played  
small part in bringing about the struggle he examines  
the efforts made by america to avoid conflict through  
means of economic coercion efforts whose failure  
confronted the nation with two choices war or  
submission to england since the latter alternative  
presented more terrors to the recent colonists america  
went to war

Causes of International War 2008-06 now in a thoroughly  
revised and updated edition this classic text presents  
a comprehensive survey of the many alternative theories  
that attempt to explain the causes of interstate war  
for each theory greg cashman examines the arguments and  
counterarguments considers the empirical evidence and  
counterevidence generated by social science research  
looks at historical applications of the theory and  
discusses the theory's implications for restraining  
international violence among the questions he explores  
are are humans aggressive by nature do individual  
differences among leaders matter how might poor  
decision making procedures lead to war why do leaders  
engage in seemingly risky and irrational policies that  
end in war why do states with internal conflicts seem  
to become entangled in wars with their neighbors what  
roles do nationalism and ethnicity play in  
international conflict what kinds of countries are most  
likely to become involved in war why have certain pairs  
of countries been particularly war prone over the  
centuries can strong states deter war can we find any  
patterns in the way that war breaks out how do balances  
of power or changes in balances of power make war more

~~europa imperial commercial and military rivalries~~  
between the major european empires had escalated dramatically as each struggled to assert its strength meanwhile the people of europe embraced nationalist ideas and became increasingly disinterested in compromise or reconciliation the latter half of the 19th century had seen the development of the strong alliances and deep hostilities that eventually escalated into war in 1914 but why did the politicians and monarchs of europe believe that war was inevitable how was the public persuaded that war was necessary and what events preceded the declaration of war

The Deeper Causes of the War (1914) 2009-04 wars often spring out of nowhere with little warning one need only look at the recent troubles at the lebanon israeli border for evidence of this claim at other points in history such as the run up to the second world war wars seem all but foretold how does one understand a phenomenon that at times seems so random while at others so predictable is there an underlying cause of war and if so what is it in this book david sobek argues that there is no single explanation for war factors leading to war in one case may well lead to peace in another understanding the onset of war he contends requires a movement away from single theories towards one that embraces the multi faceted causes of war the characteristics of individual states the strategic interaction of multiple states and the broad structure of the international system all affect the risk of war throughout the book sobek draws on a wide range of examples from the rise of japan in the 19th century to the emergence of hamas in the 21st century to show how both domestic and international politics push states to or pull them from the brink of armed conflict while civil war and terrorism are often viewed as a from of violence distinct from interstate war sobek examines them as simply an extreme form of asymmetric warfare from this perspective terrorism

The Causes of the War: what to Read 1916 this volume is  
a collection of some of the most influential essays by  
jack levy on the causes of interstate war these studies  
focus on the role of power in the international system  
the domestic sources of security policy and war and the  
psychology of decision making among the themes uniting  
all of these studies is that there are patterns in the  
processes leading to interstate wars that these  
patterns are complex and that an understanding of war  
requires rigorous theory and that a key prerequisite of  
theory is conceptual clarity the focus is on  
theoretical essays on war and on decision making in  
security policy these essays involve the critique and  
reconceptualization of major theories of war for each  
theory the author engages in the conceptual

clarification of key variables the identification of  
the varied causal paths through which each shapes

of the theory and the methodological hurdles

confronting valid empirical tests of the theory the

volume begins with a substantial introductory chapter

each subsequent chapter begins with a brief

introduction and ends with an annotated bibliographic

note that identifies important subsequent work on the

topic and includes a complete set of references the

chapters are organized by a levels of analysis

framework it begins with four chapters focusing on

power dynamics at the systemic or dyadic levels

including balance of power theory power transition

theory theories of preventive war and offense defense

theory it then turns to the diversionary theory of war

a leading societal level theory focusing on domestic

incentives for adventurous foreign policies next are

three studies focusing on individual level

psychological sources of security policy including

misperception learning and risk propensity in the form

of prospect theory the concluding chapter attempts to

survey the current state of the art in the study of the

causes of interstate war and identifies some of the

major unanswered questions and suggests a number of

fruitful paths for future research this book will be of

much interest to students of the causes of war

**War and Democracy** 1938 what makes wars drag on and why

do they end when they do here h e goemans brings

theoretical rigor and empirical depth to a long

standing question of securities studies he explores how

various government leaders assess the cost of war in

terms of domestic politics and their own postwar fates

goemans first develops the argument that two sides will

wage war until both gain sufficient knowledge of the

other s strengths and weaknesses so as to agree on the

probable outcome of continued war yet the incentive
