**1947** 2021-05-06 this book studies the three most important chinese foreign policy concepts under xi jinping s leadership new type of great power relations belt and road initiative and community of shared future for mankind those signature concepts are often considered as china s well thought out strategic plans reflecting beijing s concrete geopolitical vision this book however argues that these views are mistaken it develops a slogan politics approach to study chinese foreign policy concepts the overarching argument is that those concepts should be understood as multifunctional slogans for political communication on the domestic and international stages this book shows how those concepts function as political slogans to 1 declare intent 2 assert power and test domestic and international support 3 promote state propaganda and 4 call for intellectual support the slogan politics approach highlights the critical role of china s academic and local actors as well as international actors in shaping china s foreign policy ideas it provides critical insights to understand how chinese domestic actors exert their influence and voice their narratives to influence china s policy agenda and debate it suggests that the existing analyses vastly exaggerate beijing s capacity to coordinate domestic actors including forging coherent chinese foreign policy narratives and unifying use of china s policy concepts

Fact and Fiction in Global Energy Policy 2019 by the time of barack obama s inauguration as the 44th president of the united states he had already developed an ambitious foreign policy vision by his own account he sought to bend the arc of history toward greater justice freedom and peace within a year he was awarded the nobel peace prize largely for that promise in bending history martin indyk kenneth lieberthal and michael o hanlon measure obama not only against the record of his predecessors and the immediate challenges of the day but also against his own soaring rhetoric and inspiring goals bending history assesses the considerable accomplishments as well as the failures and seeks to explain what has happened obama s best work has been on major and pressing foreign policy challenges counterterrorism policy including the daring raid that eliminated osama bin laden the reset with russia managing the increasingly significant relationship with china and handling the rogue states of iran and north korea policy on resolving the israeli palestinian conflict however has reflected serious flaws in both strategy and execution afghanistan policy has been plagued by inconsistent messaging and teamwork on important softer security issues from energy and climate policy to problems in africa and mexico the record is mixed as for his early aspiration to reshape the international order according greater roles and responsibilities to rising powers obama s efforts have been well conceived but of limited effectiveness on issues of secondary importance obama has been disciplined in avoiding fruitless disputes

as with chavez in venezuela and castro in cuba and insisting that others take the lead as with qaddafi in libya notwithstanding several missteps he has generally managed well the complex challenges of the arab awakenings striving to strike the right balance between u s values and interests the authors see obama s foreign policy to date as a triumph of discipline and realism over ideology he has been neither the transformative beacon his devotees have wanted nor the weak apologist for america that his critics allege they conclude that his grand strategy for promoting american interests in a tumultuous world may only now be emerging and may yet be curtailed by conflict with iran most of all they argue that he or his successor will have to embrace u s economic renewal as the core foreign policy and national security challenge of the future
