Consultancy and Innovation 2003-09-02 this volume is dedicated to Maria Antonietta Pinto's research across the past five decades. The title reflects not only the dominance of metalinguistic awareness in Pinto's work but also the pathway through which this construct has been elaborated over the years under the influence of two great mentors: Jean Piaget for the cognitive aspects and Renzo Titone for the psycholinguistic aspects. Pinto created an original construct of metalinguistic awareness and instruments to measure it at different developmental stages. The volume pays tribute among other aspects to the heuristic value of this construct and its use in international research.

Poverty, Inequality, and the Future of Social Policy 1995-03-30 the volume grew out of research undertaken as a part of the UN University's European Perspectives Project. It addresses the consequences of the failure of large-scale industrial enterprise and the inability of central government policies to cope with the results of economic restructuring in a series of comparative case studies showing how local communities throughout Europe, East and West, rural and industrial, have responded to economic dislocation and decline and how these local initiatives have become the basis for economic regeneration.
