2023-09-11

archaeologists are increasingly interested in studying the experiences of chinese immigrants yet this area of research is mired in long standing interpretive models that essentialize race and identity showcasing the enormous amount of data available on the lives of chinese people who migrated to north america in the nineteenth century this volume charts new directions by providing fresh approaches to interpreting immigrant life in this volume leading scholars first tackle broad questions of how best to position and understand these populations they then delve into a variety of site based and topical case studies providing new approaches to themes like chinese immigrant foodways and highlighting understudied topics including entrepreneurialism cross cultural interactions and conditions in the jim crow south pushing back against old colonial based tropes contributors call for an awareness of the transnational relationships created through migration engagement with broader archaeological and anthropological debates and the expansion of research into new contexts and topics contributors linda bentz todd j braje kelly n fong d ryan gray j ryan kennedy christopher meritt laura w virginia s popper adrian praetzellis mary praetzellis chelsea rose douglas e ross charlotte k sunseri barbara l voss priscilla wegars henry yu

## ***Chinese Society in the Age of Confucius (1000-250 BC)***

2006-12-31

this book studies the formation of complex societies in prehistoric china during the neolithic and early state periods c 7000 1500 bc archaeological materials are interpreted through anthropological perspectives using systematic analytic methods in settlement and burial patterns both agency and process are considered in the development of chiefdoms and in the emergence of early states in the yellow river region interrelationships between factors such as mortuary practice craft specialization ritual activities warfare exchange of elite goods climatic fluctuations and environmental changes are emphasized this study offers a critical evaluation of current archaeological data from chinese sources and argues that although some general tendencies are noted social changes were affected by multiple factors in no pre determined sequence in this most comprehensive study to date li liu attempts to reconstruct developmental trajectories toward early states in chinese civilization and discusses theoretical implications of chinese archaeology for the understanding of social evolution

## **China in the Early Bronze Age**

2006

this book offers an archaeological study on china s ancient capitals using abundant illustrations of ancient capital sites it verifies the archaeological discoveries with documentary records the author introduces the dynamical interpretation of each ancient capital to the interpretation of the entire development history of china s ancient capitals the book points out that for most of the almost 2000 years from the earliest erlitou 二里头 to the ye city 叶城 there was an era where ancient capitals didn t have outer enclosures due to factors such as the strong national power the military and diplomatic advantage the complexity of the residents and the natural conditions thus an era of the huge ancient capitals without guards lasting for over 1000 years formed the concept that china s ancient capitals don t have outer enclosures presented in the book questions the traditional view that every settlement has walled enclosures combining science with theory it offers researchers of history a clear understanding of the development process of china s ancient capitals
