Comprehension Across the Curriculum

2010-01-01

in this important and alarming book see why so many american students are falling behind in their reading skills while others around the world excel new york times in 2011 when an international survey reported that students in shanghai dramatically outperformed american students in reading math and science president obama declared it a sputnik moment a wake up call about the dismal state of american education little has changed however since then over half of our children still read at a basic level and few become highly proficient many american children and adults are not functionally literate with serious consequences poor readers are more likely to drop out of the educational system and as adults are unable to fully participate in the workforce adequately manage their own health care or advance their children s education in language at the speed of sight internationally renowned cognitive scientist mark seidenberg reveals the underexplored science of reading which spans cognitive science neurobiology and linguistics as seidenberg shows the disconnect between science and education is a major factor in america s chronic underachievement how we teach reading places many children at risk of failure discriminates against poorer kids and discourages even those who could have become more successful readers children aren t taught basic print skills because educators cling to the disproved theory that good readers guess the words in texts a strategy that encourages skimming instead of close reading interventions for children with reading disabilities are delayed because parents are mistakenly told their kids will catch up if they work harder learning to read is more difficult for children who speak a minority dialect in the home but that is not reflected in classroom practices by building on science s insights we can improve how our children read and take real steps toward solving the inequality that illiteracy breeds both an expert look at our relationship with the written word and a rousing call to action language at the speed of sight is essential for parents educators policy makers and all others who want to understand why so many fail to read and how to change that

this is the fourth edition of james moffett s seminal text first published in 1968 which set forth the rationale and practices for the kind of individualized interactive integrative language learning environment that only today is coming into its own it proposed whole language collaborative learning active learning writing workshops the process approach student empowerment portfolio assessment and the substitution of children s literature for basal readers many years before these cornerstones of enlightened english language arts teaching became fashionable the book is the centerpiece of life work devoted to curricular innovation and constitutes a truly original approach to the nature of discourse it is cross referenced to an equally original collection of anthologies that illustrate with both professional and student writing the reading writing talking dramatizing repertoires it stakes out

and to moffett's other works that build on and extend this one from the second edition on the book has profited from the input of betty jane wagner a master teacher of teachers student centered language art k 12 is arguably the most comprehensive practically detailed and original textbook resource book on english education it covers theory and practice elementary and secondary drama oral language activities and initial literacy as well as general reading and writing furthermore verbal learning is placed in a social context and in the context of nonverbal media and arts that compete with and complement language the authors have made this edition more compact by shifting some material to a new edition of active voice and by abridging matters that no longer need to be dealt with at length because the profession is catching up with the book they have recast some matters to tie in with current vocabulary and understanding and some practices have been updated to utilize current technology in this fourth edition the book is shorter in length but broader in perspective as it continues to break new ground to integrate language arts with other learning

Reading, Writing and Learning in ESL

2008

the no child left behind act nclb is the latest in more than two decades of federal efforts to raise educational standards and an even longer stream of initiatives to improve education for poor children what lessons can we draw from these earlier efforts to help nclb achieve its goals in standards based reform and the poverty gap leading scholars in sociology economics psychology and education policy take on this critical question armed with the latest data and up to date research syntheses the authors show that standards based reform has had some positive effects particularly in the area of teacher quality moreover some of the critics' greatest fears have not been realized for example retention rates have not shot upward yet the overall pace of improvement has been slow owing in part to poor implementation based on these findings the contributors offer recommendations for the implementation and impending reauthorization of nclb these proposals such as national testing and a rethinking of achievement targets are sure to be at the center of the upcoming debate contributors include thomas dee laura desimone george farkas barbara foorman brian jacob robert m hauser paul hill tom loveless meredith phillips andrew c porter and thomas smith

Academic Language! Academic Literacy!

2009-07-06

every student deserves a great teacher not by chance but by design douglas fisher nancy frey john hattie what if someone slipped you a piece of paper listing the literacy practices that ensure students demonstrate more than a year's worth of learning for a year spent in school would you keep the paper or throw it away we think you'd keep it and that's precisely why acclaimed educators douglas fisher nancy frey and john hattie wrote visible

learning for literacy they know teachers will want to apply Hattie's head-turning synthesis of more than 15 years of research involving millions of students which he used to identify the instructional routines that have the biggest impact on student learning. These practices are visible for teachers and students to see because their purpose has been made clear, they are implemented at the right moment in a student's learning, and their effect is tangible. Yes, the Aha moments made visible by design with their trademark clarity and command of the research and dozens of classroom scenarios to make it all replicable. These authors apply Hattie's research and show you how to use the right approach at the right time so that you can more intentionally design classroom experiences that hit the surface deep and transfer phases of learning and more expertly see when a student is ready to dive from surface to deep. Which routines are most effective at specific phases of learning including word sorts, concept mapping, close reading, annotating, discussion, formative assessment, feedback, collaborative learning, reciprocal teaching, and many more? Why the 8 mind frames for teachers apply so well to curriculum planning and can inspire you to be a change agent in students' lives and part of a faculty that embraces the idea that visible teaching is a continual evaluation of one's impact on student's learning. Teachers, it's time we embrace the evidence, update our classrooms, and impact student learning in wildly positive ways. Say Doug, Nancy, and John, so let's see visible learning for literacy for what it is: the book that renews our teaching and reminds us of our influence just in time.
