*Passionate Patrons* 2010 in a literary environment dominated by men the first american to earn a living as a writer and to establish a reputation on both sides of the atlantic was miraculously a woman hannah adams dared to enter and in some ways was forced to enter a sphere of literature that had in eighteenth century america been solely a male province driven by poverty and necessity and aided by an extraordinarily adept mind and keen sense of business adams authored works on new england history sectarian history and jewish history using and citing the most recent scholarly works being published in great britain and america as a female writer she would always remain something of an outsider but her accomplishments did not by any means go unrecognized embraced by the boston intelligentsia and highly regarded throughout new england adams came to epitomize the possibility in a democratic society that anyone could rise to a circle of intellectual elites in a passionate usefulness the first book length biography of this remarkable figure gary schmidt focuses primarily on the intimate connection between adams s reading and her own literary work hers is the story of incipient scholarship in the new nation the story of a dependence that evolved into intellectual independence schmidt sets adams s works in the context of her early poverty and desperate family situation her decade long feud with one of new england s most powerful calvinist ministers her alliance with the budding unitarian movement in boston and her work establishing the first evangelical mission to palestine a task she accomplished virtually single handedly

today adams still holds a place not only as a female writer who made her way economically in the book business before any other woman or male writer could do so but also as a key figure in the transitional generation between the american revolution and the renaissance upon whose groundwork much of the country's later literature would build

The London Journal 1865 this book is an examination of personal identity exploring both who we think we are and how we construct the sense of ourselves through art it proposes that the notion of personal identity is a psycho social construction that has evolved over many centuries while this idea has been widely discussed in recent years andrew spira approaches it from a completely new point of view rather than relying on the thinking subject s attempts to identify itself consciously and verbally it focuses on the traces that the self sense has unconsciously left in the fabric of its environment in the form of non verbal cultural conventions covering a millennium of western european cultural history it amounts to an anthropology of personal identity in the west following a broadly chronological path spira traces the self sense from its emergence from the collectivity of the medieval church to its consummation in the individualistic concept of artistic genius in the nineteenth century in doing so it aims to bridge a gap that exists between cultural history and philosophy regarding cultural history especially art history it elicits significances from its material that have been thoroughly overlooked regarding philosophy it highlights the

crucial role that material culture plays in the formation of philosophical ideas it argues that the sense of personal self is as much revealed by cultural conventions and as a cultural convention as it is observable to the mind as an object of philosophical enquiry
