the tragic recognition of the extinction of the yangtze river dolphin or baiji in 2007 became a major news story and sent shockwaves around the world it made a romantic story for the

baiji was a unique and beautiful creature that features in many chinese legends and folk tales the goddess of the yangtze as it was known was also the lone representative of an entire and ancient branch of the tree of life but perhaps the greater tragedy is that its status as one of the world s most threatened mammals had been widely recognized yet despite wide publicity virtually no international funds became available a compelling read by a young naturalist samuel turvey tells the story of the plight of the yangtze river dolphin from his unique perspective as a conservation biologist deeply involved in the struggle to save the dolphin this is both a celebration of a beautiful and remarkable animal that once graced one of china s greatest rivers its natural history and its role as a cultural symbol and also a personal eyewitness account of the failures of policy and the struggle to get funds that led to its tragic demise it is a true cautionary tale that we must learn from for there are countless other threatened species that will suffer from the same human mistakes and whose loss we shall not know until it is too late

Literature 1987, Part 2 2013-11-11

the science fiction film in contemporary hollywood focuses on the american science fiction sf film during the period 2001 2020 in order to provide a theoretical mapping of the genre in the context of conglomerate hollywood using a social semiotics approach in a systematic corpus of films the book argues that the sf film can be delineated by two semiotic squares

the first one centering on the genre's more than human ontologies of bodies and the second one focusing on its imaginative worlds of worlds based on this theoretical framework the book examines the genre in six cycles which are placed in their historical context and are analyzed in relation to cultural discourses such as technological embodiment race animal human relations environmentalism global capitalism and the techno scientific empire by considering these cycles which include superhero films creature films space operas among others as expressions of the genre's basic oppositions the book facilitates the comparison and juxtaposition of films that have rarely been discussed in tandem offering a new perspective on the multiple articulations of the sf film in the new millennium
