first published in 2003 routledge is an imprint of taylor francis an informa company with an increase in visits to remote and dangerous locations around the world the number of serious and fatal injuries and illnesses associated with these expeditions has markedly increased thus so has the need for medical personnel trained specifically to handle the health risks that are faced when far removed from professional care resources expedition and wilderness medicine covers everything a prospective field physician or medical consultant needs to prepare for when beginning an expedition divided into three parts expedition planning expeditions in unique environments and illness and injuries on expeditions this unique book covers everything that the expedition physician needs to know book jacket atlas of the indian tribes of the continental united states and the clash of cultures the atlas identifies of the native american tribes of the united states and chronicles the conflict of cultures and indians fight for self preservation in a changing and demanding new world the atlas is a compact resource on the identity location and history of each of the native american tribes that have inhabited the land that we now call the continental united states and answers the three basic questions of who where and when regrettably the information on too many tribes is extremely limited for some there is little more than a name the history of the american indian is presented in the context of america s history its westward expansion official government policy and public attitudes by seeing something of who we were we are better prepared to define who we need to be the atlas will be a convenient resource for the casual reader the researcher and the teacher and the student alike a unique feature of this book is a master list of the varied names by which the tribes have been known throughout history edgar franz deserves credit for having been the first to use siebold s private papers and manuscripts to provide a detailed analysis of his influence on russia s policy on opening up japan franz proves that siebold s intimate knowledge of japan and his sensitive attitude to the japanese mentality were crucial to russian negotiations subsequently russia was the first foreign nation to succeed in concluding a treaty with japan that included establishing trade relations between the two nations it has been possible to verify siebold s significance for the modernization of japan the political dimension of japan s activities and siebold s great influence on the opening of japan for trade and navigation the political background and impact of a british attempt to conquer french north america this grammar offers a comprehensive description of kuuk thaayorre a paman language spoken on the west coast of cape york peninsula australia the paman languages of cape york have long been recognized for their exhibition of considerable phonological semantic and morphosyntactic revealing continuous occupation extending from the 6th century bc to the present day the papers in this volume cover the orthogneisses and the pan african granitoids and charnockites in addition to studies on the regional metamorphism and the structural evolution of central dronning maud land dml the results presented in this volume fill gaps in the knowledge of the geological structure and history of cdml and thus find interest in the antarctic research community in at large and at small anne fadiman returns to one of her favorite genres the familiar essay a beloved and hallowed literary tradition recognized for both its intellectual breadth and its miniaturist focus on everyday experiences with the combination of humor and erudition that has distinguished her as one of our finest essayists fadiman draws us into twelve of her personal obsessions from her slightly sinister childhood enthusiasm for catching butterflies to her monumental crush on charles lamb from her wistfulness for the days of letter writing to the challenges and rewards of moving from the city to the country many of these essays were composed under the influence of the subject at hand fadiman ingests a shocking amount of ice cream and divulges her passion for häagen dazs chocolate chocolate chip and her brother s homemade liquid nitrogen kahlúa coffee recipe included she sustains a terrific caffeine buzz while recounting balzac s coffee addiction and she stays up till dawn to write about being a night owl examining the rhythms of our circadian clocks and sharing such insomnia cures as her father s nocturnal word games and lewis carroll s mathematical puzzles at large and at small is a brilliant and delightful collection of essays that harkens a revival of a long cherished genre this handbook provides a cutting edge study of the fast developing field of international law on the protection of cultural heritage by taking stock of the recent developments and of the core concepts and current challenges the legal protection of cultural heritage has come under renewed focus from the international community and states since the 1990s this is evidenced by the adoption of a range of international instruments countries are also enacting cultural heritage legislation or overhauling existing laws within their own national territory contributions address the protection of immovable and movable tangible and intangible cultural heritage in peacetime and in the event of armed conflict as well as the interaction between specific regimes of cultural heritage protection with other fields of international law including international criminal law human rights and humanitarian law environmental law international trade investments and intellectual property the last part of the handbook covers diverse regional systems of heritage protection the british arctic expedition of 1875 6 was the first major british naval expedition to the high arctic where science was almost as important as geographical exploration there were hopes that the expedition might find the hypothetical open polar sea and with it the longed for northwest passage and it did reach the highest northern latitude to date the royal society compiled instructions for the expedition and selected two full time naturalists an unusual naval concession to science of whom one henry wemyss feilden proved a worthy choice feilden was

~~a soldier who fought in most of the wars in his lifetime including the american civil war on~~  
the confederate side on board hms alert he kept a daily journal a record important for its scientific content but also as a view of the expedition as seen by a soldier revealing admiration and appreciation for his naval colleagues he performed whatever tasks were given to him including the rescue of returning sledge parties stricken by scurvy he also did a remarkably comprehensive job in mapping the geology of smith sound some of his work on the cape rawson beds was the most reliable until the 1950s he was an all round naturalist and a particularly fine geologist and ornithologist he was not just a collector he pondered the significance of his findings within the context of the best modern science of his day in zoology charles darwin on evolution in botany hooker on phytogeography and in geology charles lyell s system he illustrated his journal with his own sketches and also enclosed the printed programmes of popular entertainments held on the ship and verses for birthdays and sledging there was a printing press onboard the journal gives a vigorous impression of a ship s company well occupied through the winter then increasingly active in sledging and geographical discovery in spring before the scurvy induced decision to head home in the summer of 1876 after his return feilden had dealings with many scientists and their institutions finding homes for and meaning in his collections ethnobotany of pohnpei examines the relationship between plants people and traditional culture on pohnpei one of the four island members of the federated states of micronesia traditional culture is still very strong on pohnpei and is biodiversity dependent relying on both its pristine habitats and managed landscapes native and introduced plants and animals and extraordinary marine life this book is the result of a decade of research by a team of local people and international specialists carried out under the direction of the mwolalen wahu ileilehn pohnpei pohnpei council of traditional leaders it discusses the uses of the native and introduced plant species that have sustained human life on the island and its outlying atolls for generations including piper methysticum locally known as sakau and recognized throughout the pacific as kava which is essential in defining cultural identity for pohnpeians the work also focuses on ethnomedicine the traditional medical system used to address health conditions and its associated beliefs pohnpei and indeed the micronesia region is one of the world s great centers of botanical endemism it is home to many plant species found nowhere else on earth the ultimate goal of this volume is to give readers a sense of the traditional ethnobotanical knowledge that still exists in the area to make them aware of its vulnerability to modernization and to encourage local people to respect this ancient knowledge and keep such practices alive it presents the findings of the most comprehensive ethnobotanical study undertaken to date in this part of micronesia and sets a new standard for transdisciplinary research and collaboration locked in a desperate cold war race against the soviets to find out if humans could survive in space and live through a free fall from space vehicles the pentagon gave civilian adventurer nick piantanida s project strato jump little notice until may day 1966 operating in the shadows of well funded high visibility air force and navy projects the former truck driver and pet store owner set a new world record for manned balloon altitude rising more than 23 miles over the south dakota prairie piantanida nearly perished trying to set the world record for the highest free fall parachute jump from that height on his next attempt he would not be so lucky part harrowing adventure story part space history part psychological portrait of an extraordinary risk taker this story fascinates and intrigues the armchair adventurer in all of us co written by a professor of business management and a mountaineering equipment manufacturer this book uses the backdrop of the evolution of polar exploration and mountain climbing beyond just mt everest expeditions to explore how innovation among equipment manufacturers helped change the face fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information but its nature and process have been seriously understudied in biological anthropology and primatology this book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice it is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method the questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology
