herodotus was an ancient greek historian who lived in the fifth century bc c 484 425 bc he has been called the father of history and was the first historian known to collect his materials systematically test their accuracy to a certain extent and arrange them in a well constructed and vivid narrative the histories his masterpiece and the only work he is known to have produced is a record of his inquiry being an investigation of the origins of the greco persian wars and including a wealth of geographical and ethnographical information the histories were divided into nine books named after the nine muses the muse of history clio representing the first book then euterpe thaleia melpomene terpsichore erato polymnia ourania and calliope for books 2 to 9 respectively the congressional record is the official record of the proceedings and debates of the united states congress it is published daily when congress is in session the congressional record began publication in the complicated tasks assigned to it by the ip protocols or if you just want to learn about modern networking through real life examples understanding linux network internals is for you like the popular o reilly book understanding the linux kernel this book clearly explains the underlying concepts and teaches you how to follow the actual c code that implements it although some background in the tcp ip protocols is helpful you can learn a great deal from this text about the protocols themselves and their uses and if you already have a base knowledge of c you can use the book s code walkthroughs to figure out exactly what this sophisticated part of the linux kernel is doing part of the difficulty in understanding networks and implementing them is that the tasks are broken up and performed at many different times by different pieces of code one of the strengths of this book is to integrate the pieces and reveal the relationships between far flung functions and data structures understanding linux network internals is both a big picture discussion and a no nonsense guide to the details of linux networking topics include key problems with networking network interface card nic device drivers system initialization layer 2 link layer tasks and implementation layer 3 ipv4 tasks and implementation neighbor infrastructure and protocols arp bridging routing icmp author christian benvenuti an operating system designer specializing in networking explains much more than how linux code works he shows the purposes of major networking features and the trade offs involved in choosing one solution over another a large number of flowcharts and other diagrams enhance the book s understandability considers legislation to extend educational and vocational training assistance
