pursuing sustainable development requires a whole of society effort where the public sector engages with citizens the private sector and civil society organisations with this goal in mind in 2014 the nuevo león mexico government created the nuevo león s council for strategic planning to develop inter alia a 2015 2030 strategic plan

PC Mag 1992-11-10

this open access book examines the history and role of money money is often defined in terms of three interrelated functions as a medium of exchange store of value and unit of account researchers frequently discuss the first two functions but tend to ignore unit of account this book focuses on how a unit of account or denomination can be defined and can be derived from the monetary system in the case of paper money and coins we know how to determine the denomination of money based on the problem of the least number of weights defined by bâchet and proved by hardy and wright 1960

however in the case of digital or cryptocurrency denomination may not matter because digital or cryptocurrency uses a wallet that is essentially denomination free a wallet can contain any amount of currency without upper and lower limits when people talk about the stablecoin i.e. the stable price of digital and cryptocurrency with the major legal tender they take a unit of account or denomination of digital or cryptocurrency as given this arrangement destroys the nature of denomination free or decentralized autonomy as it were exploring how we can consolidate with these two views of denomination this book will appeal to anyone interested in creating new digital or cryptocurrencies it also serves as a textbook on central bank digital currency

Handbook on Battery Energy Storage System *2018-12-01*

when you think of arts therapy you don't often associate the practice with profit however ethical economic models are essential in allowing clients the most access to arts therapy services art therapists don't generally have formal training in economics which can be challenging when developing their professional services this book offers the fundamentals of micro and macro economics that apply to creating a sustainable and ethical business model that supports the development of the arts therapies profession worldwide through economic theory and international case studies the authors consider the business side of therapeutic arts service with recommendations for developing an ethical and sustainable practice with key insights and informative examples this book will serve as a guide for small business owners looking to develop their arts therapy practice
