this excellent book provides an extremely readable account which deserves to be widely read by a more general audience in short the author in making sense of current imaginings presents a mix of theoretical and empirical debates as he challenges exclusionary forces the book s principal aim is to take a critical look at the nature and sources of inequalities in contemporary societies and examine the prospects for an inclusive society this aim captures an important strength of the text as the analysis attempts to move beyond simple description and provide explanations and possible solutions to enable policy and practice to tackle disadvantage and discrimination social policy this book addresses many of the key problems facing contemporary societies the social significance attached to various forms of difference most notably race and ethnicity has been seen as resulting in the exclusion of some groups from their full rights as citizens this in turn is viewed as presenting a series of barriers to the creation of more inclusive societies peter ratcliffe explores these arguments in a variety of substantive contexts for example immigration and the treatment of refugees and asylum seekers housing and segregation education labour markets and policing and urban conflict particular emphasis is placed on the role of social agency on the part of

minorities in confronting exclusionary forces this lively and highly readable account deals with difficult theoretical ethical and policy issues without resort to unnecessary jargon it is essential reading for undergraduate students in sociology social policy urban geography law and political science and is also of value to the general reader and researcher

bringing together a variety of scholarly voices this book argues for the necessity of understanding the important role literature plays in crystallizing the ideologies of the oppressed while exploring the necessarily racialized character of utopian thought in american culture and society utopia in everyday usage designates an idealized fantasy place but within the interdisciplinary field of utopian studies the term often describes the worldviews of non dominant groups when they challenge the ruling order in a time when white supremacy is reasserting itself in the us and around the world there is a growing need to understand the vital relationship between race and utopia as a resource for resistance utopian literature opens up that relationship by envisioning and negotiating the prospect of a better future while acknowledging the brutal past the collection fills a critical gap in both literary studies which has largely ignored the issue of race and utopia and utopian studies which has said too little about race

from everyday apps to complex algorithms ruha benjamin cuts through tech industry hype to understand how emerging technologies can reinforce white supremacy and deepen social inequity benjamin argues that automation far from being a sinister story of racist programmers scheming on the dark web has the potential to hide speed up and deepen discrimination while appearing neutral and even benevolent when compared to the racism of a previous era presenting the concept of the new jim code she shows how a range of discriminatory designs encode inequity by explicitly amplifying racial hierarchies by ignoring but thereby replicating social divisions or by aiming to fix racial bias but ultimately doing quite the opposite moreover she makes a compelling case for race itself as a kind of technology designed to stratify and sanctify social injustice in the architecture of everyday life this illuminating guide provides conceptual tools for decoding tech promises with sociologically informed skepticism in doing so it challenges us to question not only the technologies we are sold but also the ones we ourselves manufacture visit the book s free discussion guide [here](#)
