International Economic Integration: Challenges and Opportunities for Developing Markets

2012-12-06

the main objective of this book is to address the international integration through four chapters each one highlighting the challenges and opportunities for developing countries especially emerging ones as they hold the largest growth potential and the greatest possibility of becoming modern industrial economies with a higher standard of living kolodko 2002 throughout each of the chapters there are questions designed to test the comprehension of each topic moreover at the end of each section students will find questions and exercises to help them consolidate their learning process the book ends with a set of conclusions emphasizing the recent growth of most developing economies that have changed free trade geopolitics and how the new world relations bear both challenges and opportunities for these types of economies

European Socio-Economic Integration

economic integration is one of the most noteworthy issues in international economic policy at the end of the twentieth century the recent examples of the european union eu and the north american free trade association nafta have raised important questions about the economic integration process and the possible establishment of economic unions in other parts of the world against the backdrop of the financial crisis in europe and prospects of increasing integration in asia this volume showcases research from an international array of researchers to provide a basic understanding of the current issues problems challenges and opportunities for achieving integration addressing both empirical and theoretical aspects of such topics as monetary union social policy reform and social union public finance and technology policy the chapters in part 1 are focused primarily on economic issues while part 2 covers on social policy the welfare state and political reforms with a particular emphasis on the european union among the questions addressed what are the main determinants and implications for socio economic integration how can economic policy influence the growth and integration process why is innovation important for regional economic development what has been the policy response so far and what lessons have we learned from it and finally what are our action lines for the future

Renewable Energy Integration

2015

this book presents different aspects of renewable energy integration from the latest developments in renewable energy technologies to the currently growing smart grids the importance of different renewable energy sources is discussed in order to identify the advantages and challenges for each technology the rules of connecting the renewable energy sources have also been covered along with practical examples since solar and wind energy are the most popular forms of renewable energy sources this book provides the challenges of integrating these renewable generators along with some innovative solutions as the complexity of power system operation has been raised due to the renewable energy integration this book also includes some analysis to investigate the characteristics of power systems in a smarter way this book is intended for those working in the area of renewable energy integration in distribution networks

while the major trends in european integration have been well researched and constitute key elements of narratives about its value and purpose the crises of integration and their effects have not yet attracted sufficient attention this volume with original contributions by leading german scholars suggests that crises of integration should be seen as engines of progress throughout the history of european integration rather than as expressions of failure and regression a widely held assumption it therefore throws new light on the current crises in european integration and provides a fascinating panorama of how challenges and responses were guiding the process during its first five decades publisher s website

in the united states broad study in an array of different disciplines â arts humanities science mathematics engineeringâ as well as an in depth study within a special area of interest have been defining characteristics of a higher education but over time in depth study in a major discipline has come to dominate the curricula at many institutions this evolution of the curriculum has been driven in part by increasing specialization in the academic disciplines there is little doubt that disciplinary specialization has helped produce many of the achievement of the past century researchers in all academic disciplines have been able to delve more deeply into their areas of expertise grappling with ever more specialized and fundamental problems yet today many leaders scholars parents and students are asking whether higher education has moved too far from its integrative tradition towards an approach heavily rooted in disciplinary silos these silos represent what many see as an artificial separation of academic disciplines this study reflects a growing concern that the approach to higher education that favors disciplinary specialization is poorly calibrated to the challenges and opportunities of our time the integration of the humanities and arts with sciences engineering and medicine in higher education examines the evidence behind the assertion that educational programs that mutually integrate learning experiences in the humanities and arts with science technology engineering mathematics and medicine stemm lead to improved educational and career outcomes for undergraduate and graduate students it explores evidence regarding the value of integrating more stemm curricula and labs into the academic programs of students majoring in the humanities and arts and evidence regarding the value of integrating curricula and experiences in the arts and humanities into college and university stemm education programs

as the impetus of globalization continues to gather pace more and more people leave their homes pursuing dreams of a better life for themselves and their families muslim immigrants converging on europe from widely divergent communities scattered throughout north africa the middle east and south east asia represent a great variety of local cultures and traditions trans mediterranean networks form the basis of migration routes and are key factors in the destinations of these migrants and in the overall process of immigration be this towards europe or other

muslim countries south north fluxes intertwine with south south fluxes among which the gulf arab countries stand out as a prime destination not only for low skilled labour different situations emerge within a variegated discourse on co existence integration assimilation and the preservation of identity the adoption of this transnational dimension incorporating both destination and points of origin enables the investigation of migration to move beyond a purely eurocentric approach thus different national patterns are analyzed with a focus on a number of significant case studies by debating policies and cultural approaches the aim is to add innovative scholarship to the challenge of integration cross cultural pluralism on the part of the nation states comprising the european union is one avenue for moving the dialogue between different cultural frameworks towards a more compatible form

singapore s success as a global city is in no small part attributable to its stance on foreign labour and immigrants illustrated by a largely welcoming but discerning immigration regime to fulfil vital socio economic needs however this fairly liberal policy on immigration has been met with substantial disquiet over the last

decade xenophobic tendencies have surfaced periodically and have been compounded by the covid 19 pandemic this edited volume spotlights these contemporary issues on immigrant integration in singapore and adopts a functional approach by explicitly bridging academic and practitioner perspectives the chapters are organised into three sections the first section on challenges discusses various dominant trends obstacles to immigrant integration based on ethnicity culture and religion and the fear and associated emotions that characterise reactions to immigration the second section focuses on communities their perspectives and lived experiences in singapore society the latter differ substantially depending on migrant statuses and are contingent on social capital defined in relation to locals in the city state the last section seeks to illustrate the various solutioning endeavours in tandem with the contentious nature of immigration these concrete efforts range from ground up initiatives community based collaborative approaches and government programming all seeking to advance immigrant integration in singapore

because trucks in bangladesh and india are not allowed to operate across the border cargo is transloaded at the border and indian trucks traveling between northeast india and the rest of india must go around bangladesh through the siliguri corridor which significantly increases transport and trade costs this lack of integration means that it is more costly for bangladesh and india to trade with each other than for either of them to trade with europe as a result bilateral trade represents only about 10 percent of bangladesh s trade and a mere 1 percent of india s trade connecting to thrive challenges and opportunities of transport integration in eastern south asia presents a collection of innovative technical analyses that show what is needed to achieve seamless connectivity in the region the report explores the extent to which the bangladesh bhutan india nepal motor vehicles agreement mva supports the cross border operation of road transport services and identifies the gaps in the agreement that need to be addressed to improve its effectiveness it assesses the potential shift of freight traffic to new routes and modes in eastern india and bangladesh once the mva is implemented and the potential impact of the mva on wages employment and income in bangladesh and india it explores how the local impacts of a regional corridor could be enhanced in rural areas by improving access to markets along the corridors and how women s participation in export oriented agriculture value chains could be improved to allow women to take advantage of improved regional connectivity connecting to thrive will be of interest to policy makers private sector practitioners and academics with an interest in regional connectivity in eastern south asia

using wireless sensor networks as part of pervasive computing scenarios is a difficult problem it involves providing functionality and node behavior required by pervasive computing applications given the very limited capabilities and the constraints of wireless sensor nodes the goal of this work is to investigate the problem of integrating wireless sensor nodes and wireless sensor networks in pervasive computing scenarios and to develop solutions that facilitate such an integration based on an analysis of both research areas of their specific properties and requirements as well as the similarities and differences of the two fields we identify and discuss a set of five fundamental problem areas that complicate the integration of sensor networks and pervasive computing communication network setup and configuration user experience security and flexibility and adaptability in the main part of this work we then introduce a total of six solution approaches that deal with different aspects of

the identified problem areas
