the definitive career guide for grad students adjuncts post docs and anyone else eager to get tenure or turn their ph d into their ideal job each year tens of thousands of students will after years of hard work and enormous amounts of money earn their ph d and each year only a small percentage of them will land a job that justifies and rewards their investment for every comfortably tenured professor or well paid former academic there are countless underpaid and overworked adjuncts and many more who simply give up in frustration those who do make it share an important asset that separates them from the pack they have a plan they understand exactly what they need to do to set themselves up for success they know what really moves the needle in academic job searches how to avoid the all too common mistakes that sink so many of their peers and how to decide when to point their ph d toward other non academic options karen kelsky has made it her mission to help readers join the select few who get the most out of their ph d as a former tenured professor and department head who oversaw numerous academic job searches she knows from experience exactly what gets an academic applicant a job and as the creator of the popular and widely respected advice site the professor is in she has helped countless ph d s turn themselves into stronger applicants and land their dream careers now for the first time ever karen has poured all her best advice into a single handy guide that addresses the most important issues facing any ph d including when where and what to publish writing a foolproof grant application cultivating references and crafting the perfect cv acing the job talk and campus interview avoiding the adjunct trap making the leap to nonacademic work when the time is right the professor is in addresses all of these issues and many more the postdoc landscape offers historical international and domestic examples solutions and strategies for addressing the needs of postdoctoral scholars in terms of their presence in government industry and the academy growing issues and concerns are identified with a clear direction in terms of what practitioners policymakers and educators can do to improve the working conditions of postdoctoral scholars the book includes chapters centered on three themes the postdoc landscape postdoc support and postdoc career literacy agency and choice this comprehensive reference serves as a guide for scholars individuals who supervise and mentor postdoctoral scholars and policymakers outlines practical tools to help universities and organizations develop an infrastructure for supporting postdocs identifies the challenges that postdocs face and offers strategies on how to address the challenges includes a diverse range of voices and experiences from leading experts in the field the concept of postdoctoral training came to science and engineering about a century ago since the 1960s the performance of research in the united states has increasingly relied on these recent phds who work on a full time but on a temporary basis to gain additional research experience in preparation for a professional research career such experiences are increasingly seen as central to careers in research but for many the postdoctoral experience falls short of expectations some postdocs indicate that they have not received the recognition standing or compensation that is commensurate with their experience and skills is this the case if so how can the postdoctoral experience be enhanced for the over 40 000 individuals who hold these positions at university government and industry laboratories this new book offers its assessment of the postdoctoral experience and provides principles action points and recommendations for enhancing that experience identifies and describes specific government assistance opportunities such as loans grants counseling and procurement contracts available under many agencies and programs contains 1 412 assistance programs administered by 57 federal agencies in agriculture crime control education employment and training health and human services housing and homeownership and science and technology chapters how to use the catalog agency summary agency programs alpha index of programs applicant eligibility deadlines index functional index subject index deleted and added programs crosswalk of changes to program numbers and titles program descriptions programs requiring executive order 12372 review authorization appendix

agency addresses sources of additional info and developing and writing grant proposals identifies and describes specific government assistance opportunities such as loans grants counseling and procurement contracts available under many agencies and programs a rising median age at which phd s receive their first research grant from the national institutes of health nih is among the factors forcing academic biomedical researchers to spend longer periods of time before they can set their own research directions and establish there independence the fear that promising prospective scientists will choose other career paths has raised concerns about the future of biomedical research in the united states at the request of nih the national academies conducted a study on ways to address these issues the report recommends that nih make fostering independence of biomedical researchers an agencywide goal and that it take steps to provide postdocs and early career investigators with more financial support for their own research improve postdoc mentoring and establish programs for new investigators and staff scientists among other mechanisms this report makes the case for better data collection by research institution and data sharing a larger goal of this study is not only to propose ways to make the postdoctoral system better for the postdoctoral researchers themselves but also to better understand the role that postdoctoral training plays in the research enterprise it is also to ask whether there are alternative ways to satisfy some of the research and career development needs of postdoctoral researchers that are now being met with several years of advanced training the ten year anniversary of the book offers an excellent opportunity to publish a second edition several aspects of the book have evolved considerably since its first printing for instance substantial revision to the internship licensure and certification processes has occurred and are reflected in this resource much of the literature on clinical psychology cultural sensitivity and the current job market is updated changes in technology have large effects on teaching and practicing clinical psychology these modifications are needed to offer appropriate and updated information for students in short virtually every chapter has substantial modification to ensure that the material is accurate and up to date contains data on the aoa organization a list of osteopathic physicians in the u s canada and some foreign countries a list of aoa certified physicians aoa divisional state societies practice and nonpractice affiliates colleges of osteopathic medicine osteopathic hospitals and data on training and education programs step by step graduate school guide and self help book complete with everything you need to know to succeed at all stages of your phd from applying to graduate schools to successfully finishing the degree includes the four steps that you can take for guaranteed and speedy graduation success is about knowing what it is going to take and this book will tell you just that the how to phd book achieved rank 1 bestseller in the college guides category and rank 3 in the adult continuing education category for free books on amazon what is how to phd graduate school handbook easy to read to the point self help book everything you need to know includes the below listed and more sample statement of purpose from a successful graduate school application sample advisor breakup email for when you need to switch research groups seven benefits you can leverage as a teaching assistant complete steps for passing the prelim or candidacy exam ten ways to improve your talks complete steps for publishing your research in a top journal the four types of journal papers you can contribute to in graduate school reasons why graduating is hard and how to tackle each situation the four steps for guaranteed and speedy graduation while every phd is unique each one is a journey filled with challenge and struggle how to phd the graduate school handbook is the first book of a series and also the first of its kind it is a book filled with everything i wish i had known before starting graduate school whether you are considering getting a phd or have already started this book is for you as it takes you through all the stages of getting the degree it is complete with everything from how to get into graduate school to how to actually finish successfully in between you will learn about the importance of finding a good advisor finding a good advisor how to pass the candidacy exam or prelim fighting demoralization and how to communicate your research including writing papers graduate school handbook every chapter in this self help book is meant to tackle a specific problem in your graduate school career it all culminates in the most important chapter endgame where i spell out how you can successfully wrap up your phd the how to phd book also includes excerpts from my next book specifically on the following topics to postdoc or not to postdoc that is

the tension job search why adding value is the best thing to do good news you can get the book for free scroll to where it says get it free on the book s website howtophd org then simply type in your email and i will send you instructions on how to get the book for free doing a phd can make you feel isolated and lead to mental health problems this is why how to phd exists my goal is to provide community support and actionable steps to help students succeed in phd programs and overcome the challenges of academia categories self help college guides adult and continuing education phd handbook phd help book graduate school handbook since the end of the second world war the united states has developed the world s preeminent system for biomedical research one that has given rise to revolutionary medical advances as well as a dynamic and innovative business sector generating high quality jobs and powering economic output and exports for the u s economy however there is a growing concern that the biomedical research enterprise is beset by several core challenges that undercut its vitality promise and productivity and that could diminish its critical role in the nation s health and innovation in the biomedical industry among the most salient of these challenges is the gulf between the burgeoning number of scientists qualified to participate in this system as academic researchers and the elusive opportunities to establish long term research careers in academia the patchwork of measures to address the challenges facing young scientists that has emerged over the years has allowed the u s biomedical enterprise to continue to make significant scientific and medical advances these measures however have not resolved the structural vulnerabilities in the system and in some cases come at a great opportunity cost for young scientists these unresolved issues could diminish the nation s ability to recruit the best minds from all sectors of the u s population to careers in biomedical research and raise concerns about a system that may favor increasingly conservative research proposals over high risk innovative ideas the next generation of biomedical and behavioral sciences researchers breaking through evaluates the factors that influence transitions into independent research careers in the biomedical and behavioral sciences and offers recommendations to improve those transitions these recommendations chart a path to a biomedical research enterprise that is competitive rigorous fair dynamic and can attract the best minds from across the country this report provides an assessment of nih s programs for increasing the participation in biomedical science of individuals from underrepresented minority groups the report examines using available data and the results of a survey of nih trainees the characteristics and outcomes of programs at the undergraduate graduate postdoctoral and junior faculty levels the report provides recommendations for improving these programs and their administration it also recommends how nih can improve the data it collects on trainees in all nih research training programs so as to enhance training program evaluation summaries of papers contained in the journal accompany each issue 19

**Individual Postdoctoral Fellowship (F32) Applications Letters of Reference** 1988 the definitive career guide for grad students adjuncts post docs and anyone else eager to get tenure or turn their ph d into their ideal job each year tens of thousands of students will after years of hard work and enormous amounts of money earn their ph d and each year only a small percentage of them will land a job that justifies and rewards their investment for every comfortably tenured professor or well paid former academic there are countless underpaid and overworked adjuncts and many more who simply give up in frustration those who do make it share an important asset that separates them from the pack they have a plan they understand exactly what they need to do to set themselves up for success they know what really moves the needle in academic job searches how to avoid the all too common mistakes that sink so many of their peers and how to decide when to point their ph d toward other non academic options karen kelsky has made it her mission to help readers join the select few who get the most out of their ph d as a former tenured professor and department head who oversaw numerous academic job searches she knows from experience exactly what gets an academic applicant a job and as the creator of the popular and widely respected advice site the professor is in she has helped countless ph d s turn themselves into stronger applicants and land their dream careers now for the first time ever karen has poured all her best advice into a single handy guide that addresses the most important issues facing any ph d including when where and what to publish writing a foolproof grant application cultivating references and crafting the perfect cv acing the job talk and campus interview avoiding the adjunct trap making the leap to nonacademic work when the time is right the professor is in addresses all of these issues and many more

**The Professor Is In** 2015-08-04 the postdoc landscape offers historical international and domestic examples solutions and strategies for addressing the needs of postdoctoral scholars in terms of their presence in government industry and the academy growing issues and concerns are identified with a clear direction in terms of what practitioners policymakers and educators can do to improve the working conditions of postdoctoral scholars the book includes chapters centered on three themes the postdoc landscape postdoc support and postdoc career literacy agency and choice this comprehensive reference serves as a guide for scholars individuals who supervise and mentor postdoctoral scholars and policymakers outlines practical tools to help universities and organizations develop an infrastructure for supporting postdocs identifies the challenges that postdocs face and offers strategies on how to address the challenges includes a diverse range of voices and experiences from leading experts in the field

**Research Activities** 1988 the concept of postdoctoral training came to science and engineering about a century ago since the 1960s the performance of research in the united states has increasingly relied on these recent phds who work on a full time but on a temporary basis to gain additional research experience in preparation for a professional research career such experiences are increasingly seen as central to careers in research but for many the postdoctoral experience falls short of expectations some postdocs indicate that they have not received the recognition standing or compensation that is commensurate with their experience and skills is this the case if so how can the postdoctoral experience be enhanced for the over 40 000 individuals who hold these positions at university government and industry laboratories this new book offers its assessment of the postdoctoral experience and provides principles action points and recommendations for enhancing that experience

**The Postdoc Landscape** 2017-10-31 identifies and describes specific government assistance opportunities such as loans grants counseling and procurement contracts available under many agencies and programs

**Catalog of Federal Education Assistance Programs** 1972 contains 1 412 assistance programs administered by 57 federal agencies in agriculture crime control education employment and training health and human services housing and homeownership and science and technology chapters how to use the catalog agency summary agency programs alpha index of programs applicant eligibility deadlines index functional index subject index deleted and added programs crosswalk of changes to program numbers and titles program descriptions programs requiring executive order 12372 review authorization appendix agency addresses sources of additional info and developing and writing grant

proposals

**Enhancing the Postdoctoral Experience for Scientists and Engineers** 2000-10-08 identifies and describes specific government assistance opportunities such as loans grants counseling and procurement contracts available under many agencies and programs

DHEW Publication No. (OE). 1974 a rising median age at which phd s receive their first research grant from the national institutes of health nih is among the factors forcing academic biomedical researchers to spend longer periods of time before they can set their own research directions and establish there independence the fear that promising prospective scientists will choose other career paths has raised concerns about the future of biomedical research in the united states at the request of nih the national academies conducted a study on ways to address these issues the report recommends that nih make fostering independence of biomedical researchers an agencywide goal and that it take steps to provide postdocs and early career investigators with more financial support for their own research improve postdoc mentoring and establish programs for new investigators and staff scientists among other mechanisms
