a whole intuitively ask more all the time we all enter the same way just in different places and times it proves we re all connected in some sort of way whether we meet or not our existence shows we are here to experience the different highs and lows in between how that s executed or accomplished is different for everyone one needs others to assist us in achieving it or them we do the same for others in return we may or may not enjoy the lesson that comes from it we may not even understand any of it we may not see value in it but later we do experiences may prove different what we may have learned or believed on the paths we chose we can be humbled and we can also do great things the definition of success is different for each the definition of right and wrong is the same we re all energy we absorb the energy around us if we allow it to with the influences that create it these can be fantastic and paralyzing at the same time depending on the many factors that allow it manifest they are created by beliefs emotions and experiences whatever allows us to exist is seen as different for anyone it allows us to make and learn from mistakes if we choose to it allows us to create our own fate destiny and lives with the limited and unlimited resources we are given the definition of life and success in it is different for anyone you ask the reality in how one sees and values it is different too jack connor is no different than anyone else at least he did through his experiences he s had finding the difficult lessons in it has blessed him with a new outlook toward it many things happened that he had no control over some experiences could ve been avoided all together but jack chose not to let that happen he made mistakes and then more he lived in denial based on fear things had to happen for the possibility of change some made sense while others didn t his actions effected far more than he knew the lessons learned and the highs and lows of it still continue because of it the decisions he chooses to see life in finding hope when there was none being humbled and rising back miracles happening finding a new way to live allowed him being placed where he was needed at the right time it s something he never expected there was no guarantee either but neither was he what happened to him has happened to others before and will happen to others again if you allow it to for whatever reason one change lead to another which allowed for him to see the perception of how his life was and the place he was placed in for a moment of time the results of this may never be known fully or until time allows it to it may take a lifetime

understanding why revolutions take place when they do and as they do is important in itself understanding how they are rooted in the societies they upend and the ways in which those societies share crucial similarities is

arguably even more so the enduring influence of jack goldstone s revolution and rebellion lies as much in the challenge that it issues to the long dominant model of western exceptionalism the idea that it was early modern europe s distinctive history that launched it on the path to world domination as it does in the book s persuasive account of revolutions rooted in a four stage process that advances from fiscal crisis through inter elite conflict and mass mobilization potential to the breakdown and re making of culture and ideology it can be argued that this unexpected outcome one that the author himself did not anticipate is the product of an acute problem solving ability one that made goldstone particularly receptive to alternative possibilities his insistence that early modern and modern european and asian peoples have vastly more in common than was generally recognised and followed a similar path of advanced organic development that left qing china as vulnerable to revolution as the france of the ancien régime has not only become a central contention of early 21st century sociology it has also underpinned the creation of multiple theoretical models that have nothing to do with revolution none of this would have been possible had not goldstone challenged himself by asking questions that other scholars had supposed had mundane answers
