## Notes on Military Surveying and Reconnaissance

1882

excerpt from the evolution of mine surveying instruments comprising the original paper of mr scott on the subject together with the discussion thereof and independent contributions on the subject it is believed nevertheless that the material here presented comprises in compact and convenient form information of sufficient scope and value to warrant the issue of the book by the institute r w raymond about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

## Geological Survey Water-supply Paper

1948

excerpt from the plane table and its use in topographical surveying from the papers of the united states coast survey topography is that branch of surveying by which any portion of the land surface of the earth is mapped in plan on a specified scale or proportion of nature with the plane table such a map is constructed on the ground by at once drawing upon the paper which is spread upon the table the angles subtended by different objects and determining by intersections their relative positions instead of reading off the angles on graduated instruments and afterward plotting the lines by means of a protractor as is done in other methods of surveying the practice with the plane table has in this respect a great advantage in directness and precision the measurement of distances and of vertical angles are used in conjunction with the method of intersections to obtain all the data for representing the horizontal and vertical features on the map which is drawn in the field with pencil the details being filled in according to established conventional signs the plane table of the coast survey see sketch no 30 is composed of a well seasoned drawing board with beveled or rounded edges about thirty inches in length twenty four in width and three quarters of an inch thick it is commonly made of several pieces of white pine tongued and grooved together with the grain running in different directions to prevent warping it is supported upon three strong brass arms to which it is fastened by screws passing through4 treatise on the plane table about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
