heard of the phrase start from the top procedural programming is a programming paradigm classified as imperative programming that involves implementing the behavior of a computer program as procedures a k a functions subroutines that call each other the resulting program is a series of steps that forms a hierarchy of calls to its constituent procedures procedural programming is an imperative programming paradigm which is based on the concept of the procedure a procedure also sometimes called a subroutine is a series of steps defined in a subsection of code that can be referenced elsewhere and rerun multiple times updated march 10 2023 procedural programming is one of the two main paradigms of computer programming when pursuing a career as a professional developer it can be beneficial to learn multiple languages and styles of programming this can make you a more well rounded developer and may make you more appealing as an employee the key aspect of a procedural language is the way it works with your devices when you use a procedural programming language you give specific instructions directly to your computer and tell it how to accomplish its goals through logic and step by step processes this is a tactic that approaches jobs from a top down view let s take a quick look at some key characteristics of procedure oriented programming procedural approach pop focuses on procedures or functions to perform tasks top down design programs are designed by breaking them into smaller procedures from the top to the bottom as we ve seen programming paradigms are different ways in which we can face programming problems and organize our code imperative procedural functional declarative and object oriented paradigms are some of the most popular and widely used paradigms today key features of procedural programming include procedures modularity sequential execution and control structures what are some advantages of procedural programming advantages of procedural programming include code reusability modularity and ease of learning for beginners key differences between oop and procedural programming while oop and procedural programming are both valid approaches they differ significantly in their structure and handling of data let s examine some of the major differences data handling in procedural programming data moves freely around the system the current procedural terminology cpt codes offer doctors and health care professionals a uniform language for coding medical services and procedures to streamline reporting increase accuracy and efficiency the
