learning angularjs get started with angularjs web development fast angularjs is one of the most exciting and innovative new technologies emerging in the world of web development designed to simplify the development and testing of web applications it also provides structure for the entire development process websites are no longer simple static content instead websites have become much more dynamic with a single page often serving as the entire site or application and angularjs allows web developers to build the necessary programming logic for such applications directly into a web page binding the data model for the client web application to backend services and databases angularjs also allows the extension of html so that the ui design logic can be expressed easily in an html template file learning angularjs shows you how to create powerful interactive web applications that have a well structured reusable code base that will be easy to maintain you ll also learn how to leverage angularjs s innovative mvc approach to implement well designed and well structured web pages and web applications understand how angularjs is organized and learn best practices for designing angularjs applications find out how to define modules and utilize dependency injection quickly build angularjs templates with built in directives that enhance the user experience bind ui elements to your data model so changes to your model and ui occur automatically in tandem define custom angularjs directives that extend html implement zoomable images expandable lists and other rich ui components implement client side services that interact with web servers build dynamic browser views to provide even richer user interaction create custom services you can easily reuse design unit and end to end tests for angularjs applications contents at a glance 1 jumping into javascript setting up a javascript development environment using node js defining variables understanding javascript data types using operators implementing looping creating functions understanding variable scope using javascript objects manipulating strings working with arrays adding error handling 2 getting started with angularjs why angularjs understanding angularjs an overview of the angularjs life cycle separation of responsibilities integrating angularjs with existing javascript and jquery adding angularjs to your environment bootstrapping angularjs in an html document using the global apis creating a basic angularjs application using jquery or jquery lite in angularjs applications 3 understanding angularjs application dynamics looking at modules and dependency injection defining an angularjs module object creating providers in angularjs modules implementing providers and dependency injection applying configuration and run blocks to modules 4 implementing the scope as a data model understanding scopes implementing scope hierarchy 5 using angularjs templates to create views understanding templates using expressions using filters creating custom filters 6 implementing directives in angularjs views understanding directives using built in directives 7 creating your own custom directives to extend html understanding custom directive definitions implementing custom directives 8 using events to interact with data in the model browser events user interaction events adding watches to track scope change events emitting and broadcasting custom events 9 implementing angularjs services in applications understanding angularjs services using the built in services using the q service to provide deferred responses 10 creating your own custom angularjs services understanding custom angularjs services integrating custom services into your angularjs applications 11 creating rich application components the angularjs way building a tabbed view implementing draggable and droppable elements 204 adding a zoom view field to images implementing expandable and collapsible elements adding star ratings to elements a testing angularjs applications deciding on a testing platform understanding angularjs unit tests understanding angularjs end to end testing

get started with speed building angularjs applications and scale up to a full stack web application using the existing angularjs framework without the trouble of migrating to angular 2 about this book follow the best practices of the framework to organize and modularize your application get to grips with angular s model view controller architecture create application modules with maximum

reusability and extensibility structure and use angularjs applications in your mean project in your mean project who this book is for this course is for people who want to discover how they can improve their current web applications with the existing version of angular without having to worry much about migrating to angularjs 2 what you will learn install and set up the angularjs framework create your own full featured and robust angularjs web apps create reusable directives and then extend the behavior of html on your web page optimize and maintain your web applications create more powerful full stack web applications that draw on the combined power of angularjs node js mongodb and express in the mean stack in detail the angularjs course is a journey to help you improve and scale your current web applications with the existing version of angular without having to worry about migration to angular 2 the course is divided into four modules the first part angularjs essentials is like a practical guide filled with many step by step examples that will lead you through the best practices of angularjs after a brief introduction you will learn how to create reusable components with directives you will then take a look at many data handling techniques discover a complete set of technologies that are capable to accomplish any challenge related to present transform and validate data on the user s interface finally you will discover the best way to deal with the scope and how to break up the application into separate modules giving rise to reusable and interchangeable libraries with this you ve crossed a milestone and are about to enter the world of learning by example in the next part learning angularjs by example you will learn how to effectively build apps using the angularjs platform you will be building multiple apps on this platform ranging from simple ones to more complex ones in this module you will roll up your coding sleeves and create a serious angularjs application by example a rich featured workout app take the coding a step at a time at first then once you re coding a full app in this module a lot of angularjs will fall right into place for you the third module angularjs application development cookbook will get you accustomed to the angularjs concept armed with a solid understanding of how it works insight into the best ways to wield it in real world applications and annotated code examples it is a rich library of angularjs coding solutions that you can use straight away in your own code projects you are just a step away from completing this learning path of angularjs the name of the next part mean development itself assures that you are nearing the destination the idea is simple with this part you ll take mongodb as the database express as the web framework angularjs as the frontend framework and node js as the platform and combine them together in a modular approach that will ensure the flexibility needed in modern software development this is also your graduation to full stack web development which can open many new coding and career opportunities for you style and approach get up to speed building angularjs applications then improve and scale full stack web applications using the existing angularjs framework without the trouble of migrating to angular 2
